## Aeitto B0FB3R912X

# Aeitto Nugget Ice Maker Countertop Instruction Manual

MODEL: B0FB3R912X

## Introduction

This manual provides essential information for the safe and efficient operation of your new Aeitto Nugget Ice Maker Countertop. Please read these instructions thoroughly before first use and retain for future reference.

## Important Safety Instructions

- Read all instructions before using the appliance.
- Do not operate any appliance with a damaged cord or plug, or after the appliance malfunctions or has been damaged in any manner.
- Do not immerse cord, plug, or any part of the appliance in water or other liquids.
- Close supervision is necessary when any appliance is used by or near children.
- Do not use outdoors.
- Ensure the appliance is placed on a stable, level surface.
- Only use potable water in the ice maker.
- Unplug the appliance from the outlet when not in use and before cleaning.

## Product Overview and Components

Your Aeitto Nugget Ice Maker is designed to produce soft, chewable nugget ice efficiently. Familiarize yourself with its components:

- Ice Maker Unit
- Ice Basket
- Ice Scoop
- Drip Tray
- Drainage Hose (pre-installed or included)

# Perfect Size & Accessories

Ice Scoop

Ice Basket

Drip Tray

Note: The ice basket can store up to 1.8 lbs of nugget ice.

Image: The Aetto Nugget Ice Maker showing its compact dimensions (7.3" W x 13" D x 12.8" H) and included accessories: an ice scoop, an ice basket, and a drip tray. The ice basket can store up to 1.8 lbs of nugget ice.

## Setup Instructions

- Unpacking:** Carefully remove the ice maker from its packaging. Remove all packing materials, including tape and labels.
- Placement:** Place the ice maker on a flat, stable surface away from direct sunlight and heat sources. Ensure there is adequate ventilation around the unit (at least 4 inches of space on all sides).
- Initial Cleaning:** Before first use, clean the interior of the ice maker. Refer to the "Maintenance" section for detailed cleaning instructions.
- Water Connection:** Ensure the drainage hose is properly positioned for water discharge into a sink or suitable container.

5. **Power Connection:** Plug the power cord into a grounded electrical outlet.

Image: A diagram illustrating the unique water outlet design, showing a clear hose directing water into a sink, indicating proper drainage setup.

## Operating Instructions

Follow these steps to produce nugget ice:

1. **Add Water:** Open the lid and fill the water reservoir with potable water up to the MAX fill line. Do not overfill.
2. **Start Ice Production:** Close the lid. Press the "ICE" button on the control panel. The indicator light will illuminate, and the ice-making process will begin.
3. **Monitor Ice Production:** The first batch of ice typically takes about 5 minutes. Subsequent batches may be faster. The machine can produce up to 40 lbs of ice per day.
4. **Ice Full Reminder:** The ice maker will automatically stop producing ice when the ice basket is full. The "ICE FULL" indicator light will turn on. Remove ice from the basket to resume production.
5. **Add Water Reminder:** If the water level is too low, the "ADD WATER" indicator light will turn on, and the machine will pause. Add more water to the reservoir to continue.
6. **Dispensing Ice:** Use the provided ice scoop to remove ice from the ice basket.
7. **Stopping Operation:** To stop ice production, press the "ICE" button again.

# 3 Steps to Get Nugget Ice

No more waiting

**STEP 1**  
Add Water

**STEP 2**  
Press "ICE"

**STEP 3**  
Enjoy Nugget  
Ice

Image: A visual guide demonstrating the three simple steps to produce nugget ice: 1. Add water to the reservoir. 2. Press the "ICE" button on the control panel. 3. Enjoy the freshly made nugget ice.

Image: An illustration of the ice maker's "Ice-full Reminder" feature, showing a red light sensor detecting when the ice production reaches the alert level, causing the machine to stop to save energy.

## Maintenance and Cleaning

---

Regular cleaning ensures optimal performance and hygiene of your ice maker.

### 1. Automatic Self-Cleaning:

- Ensure the water reservoir is filled with clean water.
- Press the "CLEAN" button on the control panel. The machine will initiate a 15-minute self-cleaning cycle.
- After the cycle, drain the water from the reservoir using the drainage hose.

### 2. Manual Cleaning:

- Unplug the ice maker before cleaning.
- Remove the ice basket and drip tray. Wash them with mild detergent and warm water, then rinse thoroughly.
- Wipe the interior of the water reservoir and ice storage area with a soft cloth dampened with a mild cleaning solution (e.g., vinegar and water). Rinse thoroughly by running a few cycles with clean water and draining.
- Wipe the exterior of the unit with a soft, damp cloth.
- Ensure all parts are dry before reassembling and plugging in the unit.

### 3. Descaling:

- Hard water can affect ice maker performance. Descale the unit monthly in moderately hard water areas, or every two to three weeks in hard to very hard water areas.
- Use a descaling solution suitable for ice makers or a mixture of white vinegar and water (1:1 ratio).
- Follow the descaling product's instructions or run the self-cleaning cycle with the vinegar solution, then rinse thoroughly with several cycles of clean water.

# SELF-CLEANING

1 Press

15h 15 Mins

Image: An internal view of the ice maker demonstrating the automatic self-cleaning function, showing water swirling inside the unit during the 15-minute cleaning cycle, activated by a single press of the "CLEAN" button.

Image: A map of the United States indicating regions with varying water hardness levels, alongside recommendations for descaling frequency: monthly for moderately hard water (1-120mg/L) and every two to three weeks for hard to very hard water (121-250mg/L).

## Troubleshooting Guide

If you encounter issues with your ice maker, refer to the following table:

Problem	Possible Cause	Solution
Ice maker not producing ice.	No water in reservoir. Power not connected. Ambient temperature too high.	Fill water reservoir. Ensure unit is plugged in. Move unit to a cooler location.
"ADD WATER" indicator is on.	Water level is low.	Add potable water to the reservoir.
"ICE FULL" indicator is on.	Ice basket is full.	Remove ice from the basket.
Ice tastes strange.	First use or unit needs cleaning.	Perform initial cleaning or regular maintenance cleaning. Use fresh, potable water.
Ice production is slow.	High ambient temperature. Poor ventilation. Mineral buildup.	Ensure proper ventilation. Perform descaling as per maintenance instructions.

## Specifications

**Model:** B0FB3R912X

**Brand:** Aeitto

**Product Dimensions (D x W x H):** 12.99" x 7.29" x 12.79"

**Weight:** Approximately 19.2 Pounds

**Ice Production Capacity:** Up to 40 lbs per day

**First Ice Production Time:** Approximately 5 minutes

**Water Tank Capacity:** 1 Liter

**Ice Basket Capacity:** 1.8 Pounds

**Wattage:** 110 watts

**Voltage:** 120 Volts
