Maintenance

1. Cleaning

Regularly wipe down your guitar with a soft, dry cloth to remove dust and fingerprints. For a deeper clean, use a guitar-specific cleaning solution. Avoid abrasive cleaners that could damage the finish.

2. String Replacement

Change strings regularly to maintain optimal tone and playability. Refer to the included lesson book or online resources for detailed instructions on string replacement.

3. Fretboard Care

Keep the roasted maple fretboard clean and moisturized. Use a lemon oil or fretboard conditioner periodically to prevent drying and cracking.

Troubleshooting

1. Fret Buzz

If you experience fret buzz, it may be due to low action or an uneven fret. A professional setup is recommended to address persistent fret buzz. Minor adjustments to the bridge height can sometimes alleviate this issue.

2. Tuning Instability

Ensure strings are properly stretched when new. Check that the tuning machines are securely fastened. Extreme temperature or humidity changes can affect tuning stability.
