## PRODUCT FEATURES

The Dargahou 4K 48MP WiFi Trail Camera is designed with advanced features for reliable wildlife monitoring:

- **High Definition Clarity:** Captures stunning 4K video and 48-megapixel still images, providing clear and detailed visuals of wildlife.
- **WiFi and App Connectivity:** Connects to the "TrialCam Go" mobile app via built-in Wi-Fi (up to 33 feet range) for remote operation, viewing captured media, and adjusting settings. *Note: This Wi-Fi is for app connection only and does not connect to home networks.*
- **No Glow Night Vision:** Equipped with infrared LEDs, offering a night vision range of up to 98 feet (30

meters) to capture nocturnal animal activity without disturbing them.

- **130-Degree Wide Angle Lens:** Provides an expansive field of view to ensure no significant moments are missed.
- **Fast Trigger Speed:** Features a rapid 0.05-second trigger speed to capture fast-moving subjects effectively.
- **IP66 Waterproof Design:** Built with a robust and compact housing, featuring high-quality rubberized rings to ensure IP66 waterproof and dustproof protection.

# 4K Video & 48MP Photos

Providing a more clear image resolution

Image: Visual representation of the 4K video and 48MP photo capabilities, showcasing the clarity of captured wildlife.

# Low Glow Infrared LEDs

 **Overexposure  
Suppression**

Image: The camera's low glow infrared LEDs in action, capturing an owl at night without visible flash.

Image: Demonstration of the 130-degree wide-angle view, capturing a broad scene with multiple deer.

## SETUP

Follow these steps to set up your Dargahou Trail Camera:

1. **Install Batteries:** Open the camera housing and insert 8 AA batteries (not included) into the battery compartment, ensuring correct polarity.
2. **Insert SD Card:** Insert a Micro SD card (up to 128GB, 32GB included) into the designated SD card slot. Ensure the card is formatted before first use.
3. **Power On:** Switch the power button to the "ON" position. The camera will enter test mode or start recording based on your settings.

4. **Mount the Camera:** Use the provided mounting strap to secure the camera to a tree or pole. Adjust the camera's angle to cover the desired area.
5. **Connect to App (Optional):** Download the "TrialCam Go" app from your smartphone's app store. Enable Bluetooth and Wi-Fi on your phone, then follow the app instructions to connect to the camera's built-in Wi-Fi.

Image: An open view of the camera, detailing the location of the Color LCD, menu buttons, power switch, USB port, SD card slot, 6V DC port, and battery compartment.

## OPERATING INSTRUCTIONS

The Dargahou Trail Camera offers various operating modes and settings:

## Modes of Operation

- **OFF:** Power off the camera.
- **TEST:** Allows you to adjust camera settings, preview images/videos, and manually trigger captures.
- **ON:** Activates the camera for automatic motion-activated recording based on your configured settings.

## Accessing Settings

In TEST mode, use the navigation buttons (MENU, SHOT, OK, Up/Down) to navigate through the camera's menu. You can adjust settings such as:

- Photo/Video Resolution (e.g., 48MP photos, 4K video)
- PIR Sensitivity (Motion Sensor Sensitivity)
- Trigger Interval
- Time Lapse Mode
- Date and Time Stamp
- Loop Recording

## Using the Mobile App

The "TrialCam Go" app provides convenient remote control:

1. Ensure the camera is in ON or TEST mode and Wi-Fi is enabled on your phone.
2. Open the "TrialCam Go" app and connect to the camera's Wi-Fi network (SSID and password typically found in the camera's settings or on a sticker).
3. Once connected, you can view live footage, browse captured photos and videos, download files to your phone, and modify camera settings remotely.

Your browser does not support the video tag.

Video: A demonstration of the Dargahou Trail Camera capturing various wildlife, including deer, birds, and raccoons, showcasing its night vision and motion detection capabilities.

## MAINTENANCE

---

To ensure your camera remains in optimal condition:

- **Cleaning:** Gently wipe the lens and PIR sensors with a soft, dry cloth. Avoid abrasive materials or harsh chemicals.
- **Battery Replacement:** Replace batteries when the low battery indicator appears. Always use fresh, high-quality batteries.
- **SD Card Management:** Regularly format the SD card to prevent data corruption and ensure sufficient storage space. Back up important files before formatting.
- **Storage:** When not in use for extended periods, remove batteries and store the camera in a cool, dry place.

## TROUBLESHOOTING

---

If you encounter issues with your Dargahou Trail Camera, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Camera not powering on	Low or dead batteries; incorrect battery installation	Replace with fresh batteries; ensure correct polarity.
No images/videos captured	SD card full or corrupted; incorrect settings; PIR sensor blocked	Format SD card; check camera mode (ON); clear sensor path.
Poor image/video quality	Dirty lens; low light conditions; incorrect resolution settings	Clean lens; ensure adequate lighting or use night vision; adjust resolution settings.
Wi-Fi connection issues	Out of range; incorrect app settings; camera Wi-Fi off	Move closer to camera (within 33ft); restart app/camera; ensure camera Wi-Fi is active.

## SPECIFICATIONS

Feature	Detail
