SETUP AND ASSEMBLY

Assembly of the micro mini blocks requires patience and attention to detail. Follow the specific instructions provided for each individual bird model within your kit.

1. Preparation:

- Choose a clean, well-lit, and flat workspace to prevent loss of small parts.
- Open one model's block package at a time to avoid mixing pieces from different models.
- Familiarize yourself with the instruction booklet for the specific bird model you are building.

2. Sorting Blocks:

Before starting, sort the blocks by color and shape as indicated in the model's instruction guide. This will significantly speed up the assembly process.

3. Following Instructions:

Proceed step-by-step according to the visual diagrams and written instructions. Micro blocks require precise placement. Ensure each block is firmly connected to the previous one.

4. Troubleshooting during Assembly:

If a section does not seem to fit, double-check the previous steps and the orientation of the blocks. Micro blocks can be delicate; avoid excessive force.

OPERATING (DISPLAY AND PLAY)

Once assembled, your micro mini block bird models are ready for display or gentle play.

- **Display:** Place your finished models on a stable, flat surface away from direct sunlight or extreme temperatures to prevent discoloration or warping.
- **Play:** While durable, these models are not designed for rough play. Handle them gently to avoid dislodging small parts.

MAINTENANCE

- **Cleaning:** To clean your assembled models, gently wipe them with a soft, dry cloth. For stubborn dust, a slightly damp cloth can be used, followed by immediate drying. Avoid harsh chemicals or abrasive cleaners.
- **Storage:** If disassembling for storage, keep all blocks organized by color or model in sealed containers to prevent loss. Store in a cool, dry place.
