SETUP

1. SIM Card and Storage Card Installation

Locate the SIM card tray on the side of the phone. Use the provided SIM ejector tool to open the tray. Insert your Nano-SIM cards and/or a TF (microSD) card into the designated slots. Ensure the cards are correctly oriented as indicated on the tray. Gently push the tray back into the phone until it clicks into place.

2. Powering On/Off

- **To Power On:** Press and hold the Power button (usually on the right side) until the OUKITEL logo appears on the screen.
- **To Power Off:** Press and hold the Power button until the power options menu appears. Select "Power Off" and confirm.
- **To Restart:** Press and hold the Power button, then select "Restart" from the menu.

3. Initial Setup

The first time you power on your device, you will be guided through the initial setup process. This includes selecting your language, connecting to a Wi-Fi network, setting up your Google account, and configuring security features like fingerprint unlock or facial recognition.

Connectivity and Other Features

The phone supports NFC for Google Pay, Bluetooth 5.2 for stable wireless connections, and comprehensive GPS, GLONASS, Beidou, and Galileo navigation systems. It includes dual SIM card slots for managing multiple networks and offers dual unlock options: facial recognition and a side-mounted fingerprint sensor for secure and convenient access.

MAINTENANCE

- **Cleaning:** Use a soft, damp cloth to clean the phone's exterior. Avoid harsh chemicals or abrasive materials. Ensure all ports are dry before charging or connecting accessories.
- **Software Updates:** Regularly check for and install system updates to ensure optimal performance and security. Navigate to Settings > System > System update.
- **Battery Care:** To prolong battery life, avoid extreme temperatures. Do not fully discharge the battery frequently. Use

the original charger and cable for optimal charging.

- **Storage Management:** Periodically clear unnecessary files and applications to maintain device speed and free up storage space.

TROUBLESHOOTING

- **Device Not Turning On:** Ensure the battery is charged. Connect the charger and wait a few minutes before attempting to power on again. If unresponsive, try a forced restart by holding the power button for an extended period (e.g., 10-15 seconds).
- **Screen Unresponsive:** If the screen is frozen, perform a forced restart. If the issue persists, check for physical damage or contact support.
- **Network Issues:** Check if your SIM card is properly inserted. Toggle Airplane Mode on and off. Restart the device. Verify your network settings and contact your service provider if problems continue.
- **Apps Crashing/Slow Performance:** Close background applications. Clear app cache (Settings > Apps > [App Name] > Storage > Clear cache). If issues persist, consider a factory reset (back up data first).
- **Water/Dust Exposure:** Despite its ruggedness, if the phone has been exposed to water or dust, ensure all ports are dry before charging. Do not attempt to open the device.
