7. Troubleshooting

If you encounter any issues with your daybed, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Bed feels wobbly or unstable.	Loose hardware.	Check and tighten all bolts and screws. Ensure all connections are secure.
Trundle does not slide smoothly.	Obstruction or uneven floor.	Check for objects blocking the trundle's path. Ensure the bed is on a level surface.
USB ports are not charging devices.	No power connection or faulty cable.	Ensure the bed's power cord (if applicable) is securely plugged into a working outlet. Try a different USB cable or device to rule out cable/device issues.
Blackboard is difficult to clean.	Chalk residue buildup or incorrect cleaning method.	Use a soft, damp cloth for cleaning. For stubborn residue, a mild soap solution can be used, followed by thorough drying.
