5. OPERATING INSTRUCTIONS

5.1. Lift-Up Storage Mechanism

The bed frame features a hydraulic lift mechanism for easy access to under-bed storage. To operate:

- **To Lift:** Stand at the foot of the bed. Grasp the frame firmly and lift upwards. The hydraulic pistons will assist in raising the mattress platform smoothly.
- **To Lower:** Gently push the mattress platform downwards. The hydraulic pistons will control the descent, preventing it from dropping too quickly.

Caution: Ensure no objects or body parts are in the path of the lifting mechanism when operating to avoid injury. Do not overload the storage area beyond the recommended capacity.
