## SETUP

### 1. Battery and SD Card Installation

1. Slide the battery cover to the right to open the compartment.
2. Insert the TF card (32GB included) into the designated slot until it clicks into place. Ensure correct orientation.
3. Place the high-capacity battery correctly into the battery compartment.
4. Close the battery cover securely.

**Note:** Ensure the battery is inserted in the correct direction. If installed incorrectly, the camera will not charge or power on.

## Steps for Installing the Battery

Note: Please ensure that the battery is inserted in the correct direction. If the battery is installed in the opposite direction, it will not be able to charge.

Image: Step-by-step guide for battery and SD card installation.

## 2. Charging the Battery

Connect the camera to a power source using the provided USB cable. The camera can be charged directly or by using an external battery charger (if included or purchased separately). Ensure the battery is fully charged before first use.

## OPERATING INSTRUCTIONS

### 1. Power On/Off

Press and hold the Power button (usually located on the top or side) to turn the camera on or off. The flip screen will display a welcome message upon startup.

### 2. Mode Selection

Rotate the mode dial on the top of the camera to select your desired shooting mode. Available modes include:

- **Auto:** General purpose shooting.
- **Beauty:** Enhances facial features.
- **Continuous Shot:** Captures multiple images in quick succession.
- **Portrait:** Optimizes for human subjects.
- **Beach:** Adjusts settings for bright, outdoor scenes.
- **Retro:** Applies a vintage filter.
- **Night Scene:** Improves low-light performance.
- **Negative Film:** Applies a negative film effect.
- **Video:** For recording video footage.
- **Slow Motion:** Records video at a higher frame rate for slow-motion playback.
- **Time-Lapse:** Captures a series of images over time to create a time-lapse video.

## 3. Taking Photos

Once a photo mode is selected, frame your shot using the flip screen. Gently press the shutter button halfway down to activate autofocus, then press it fully to capture the image.

## 4. Recording Videos

Switch the mode dial to 'Video'. Press the shutter button to start recording. Press it again to stop. Some modes allow for pausing and resuming video recording.

## 5. Using the Flip Screen

The 2.88-inch screen can be rotated 180° to face forward, allowing for easy self-portraits and vlogging. Adjust the screen to your preferred viewing angle.

## 6. Digital Zoom

Use the zoom controls (often marked 'W' for wide and 'T' for telephoto) to adjust the 16X digital zoom. This allows you to capture distant subjects with clarity.

# USB charging & Files Transfer

- Easy charging and image transfer, with video calls, live streaming, vlogging, and more.
- An Ideal Gift for Kids, Adults and Everyone

## 7. Special Features

- **Built-in Fill Light:** Activates automatically or can be manually controlled to enhance visibility in low-light conditions.
- **Anti-Shake:** Helps stabilize images and videos, reducing blur from camera movement.
- **Self-Timer:** Set a delay (e.g., 2s, 5s, 10s) before a photo is taken, useful for group shots or self-portraits.
- **Smile Detection:** Automatically captures a photo when a smile is detected.
- **Artistic Filters:** Apply various filters to your photos for creative effects.

## **CONNECTIVITY**

### **1. USB File Transfer**

Connect the camera to your computer using the provided USB cable. The camera will appear as a removable disk, allowing you to transfer photos and videos directly to your computer.

Image: Camera connected to a laptop for file transfer and webcam use.

## 2. Webcam Functionality

When connected to a computer via USB, select the 'PC Camera' mode on the camera. This allows you to use the camera for video calls, live streaming, and online teaching.

## MAINTENANCE

- Keep the camera clean using a soft, dry cloth. For the lens, use a specialized lens cleaning cloth.
- Avoid exposing the camera to extreme temperatures, humidity, or direct sunlight for extended periods.
- Store the camera in its protective bag when not in use.
- Ensure batteries are fully charged before storage if not used for a long time.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Camera does not power on	Low battery; incorrectly inserted battery	Charge battery; reinsert battery correctly
Cannot take photos/videos	SD card full; SD card not inserted; incorrect mode	Delete files or replace SD card; insert SD card; select correct mode
Poor image quality	Low light; dirty lens; incorrect settings	Use fill light; clean lens; adjust exposure/ISO settings
Cannot connect to computer	Faulty USB cable; incorrect camera mode	Try another USB cable; ensure 'PC Camera' mode is selected
