## 2. IMPORTANT SAFETY INSTRUCTIONS

Please read all instructions carefully before using the appliance to ensure safe operation and prevent injury or damage.

- Always unplug the appliance from the electrical outlet when not in use and before cleaning.
- Do not immerse the power cord, plug, or the appliance body in water or other liquids.
- Keep the appliance out of reach of children. Close supervision is necessary when used near children.

- Use only the accessories recommended by the manufacturer.
- Ensure the water level is always within the recommended range to prevent dry heating. The anti-dry heating system will automatically shut off the device if water runs out.
- Do not touch hot surfaces. Use handles or knobs.
- This product is made from BPA-free, food-grade polypropylene, ensuring safety for your baby.
- Remove bottles promptly after heating to prevent overheating of contents.

### 3. PRODUCT COMPONENTS

---

The Growsy 10-in-1 Baby Bottle Warmer typically includes the following components:

- Main Heating Unit with Control Panel
- Bottle Basket/Lift-out Tray
- Lid/Cover
- Measuring Cup (may be included for water measurement)

### 4. SETUP

---

1. **Unpack:** Carefully remove all components from the packaging. Retain packaging for future storage or transport.
2. **Initial Cleaning:** Before first use, wipe the main unit with a damp cloth. Wash the bottle basket and lid with warm soapy water, then rinse thoroughly.
3. **Placement:** Place the appliance on a stable, flat, heat-resistant surface, away from direct sunlight, heat sources, and water. Ensure adequate ventilation around the unit.
4. **Power Connection:** Plug the power cord into a suitable electrical outlet.

### 5. OPERATING INSTRUCTIONS

---

The Growsy 10-in-1 Baby Bottle Warmer offers multiple functions for your convenience. The bright screen facilitates quiet and safe nighttime operations.

#### 5.1 Fast Heating

This function quickly heats milk or formula to the desired temperature.

1. Place the bottle into the basket and then into the main unit.
2. Add approximately 30ml of water into the heating chamber (around the bottle).
3. Select the 'Fast Heat' function. The appliance will heat the milk in 2-7 minutes, depending on the initial temperature and volume.
4. The warmer will beep 3 times and automatically shut off when the cycle is complete.
5. Immediately remove the bottle to prevent overheating. Always test the milk temperature before feeding your baby.

Höchste Qualität (999+) 

Hygienische Reinigung (999+) 

Image: A parent feeding a baby, demonstrating the quick heating capability of the Growsny bottle warmer, which prepares milk in 2-7 minutes.

## 5.2 Sterilization

The steam sterilization function eliminates 99.9% of bacteria from bottles and other baby items.

1. Place clean bottles, nipples, or other small baby items into the basket.
2. Add a sufficient amount of water (refer to the manual for exact quantity, typically 50-100ml) into the heating chamber.
3. Select the 'Sterilize' function. The appliance will heat water to 100°C (212°F) to produce steam.
4. Allow the cycle to complete. The unit will automatically shut off.

5. Use tongs to carefully remove hot items.

# Ultimate Protection

High-Temperature Disinfection Kills

**99.99%** of Germs

# Effektives Dampfen bis zu 99,9%

Image: The bottle warmer actively steaming, demonstrating its effectiveness in eliminating up to 99.9% of bacteria.

## 5.3 Food Warming

This function gently warms baby food jars or pouches.

1. Place the baby food jar or pouch into the basket.
2. Add water to the heating chamber, ensuring it covers the food container up to the desired level.
3. Select the 'Food Warm' function and set the desired temperature and time.
4. Once complete, carefully remove the food container and stir the food to ensure even heating. Always test the temperature before feeding.

## 5.4 Defrosting

Safely defrosts frozen breast milk or baby food.

1. Place the frozen breast milk bag or food container into the basket.
2. Add water to the heating chamber.
3. Select the 'Thaw' function. The appliance will gently defrost the contents.
4. Monitor the defrosting process. Once defrosted, proceed with warming if necessary, or store appropriately.

# Schnelles & schonendes Auftauen

Muttermilch zügig auftauen  
und Nährstoffe bewahren

Image: A breast milk storage bag being gently defrosted in the Growsy bottle warmer, preserving nutrients.

## 5.5 24-Hour Keep Warm Function

This function maintains milk, water, or food at a desired temperature for up to 24 hours, preventing overheating or excessive cooling.

1. After heating, select the 'Keep Warm' function.
2. Set the desired temperature. The appliance will maintain this temperature for up to 24 hours.
3. Ensure sufficient water is in the heating chamber for continuous operation.

# 24H Warmhalten

## Ihr Schutzengel für nächtliches Füttern

-  Süßer Schlaf fürs Baby
-  Erholende Ruhe für Mama
-  Gesundes Wachstum

Image: The Growsy bottle warmer positioned on a bedside table, illustrating its 24-hour warm-keeping function for convenient nighttime feedings, promoting better sleep for the family.

### 5.6 Smart Memory Function

The bottle warmer features a smart memory function that recalls your last used setting, making subsequent

operations more convenient.

## 6. MAINTENANCE AND CLEANING

---

Regular cleaning and maintenance will prolong the life of your appliance.

1. **Unplug:** Always unplug the appliance and allow it to cool completely before cleaning.
2. **Exterior Cleaning:** Wipe the exterior of the main unit with a damp cloth. Do not use abrasive cleaners or immerse the unit in water.
3. **Interior Cleaning:** Wash the bottle basket and lid with warm soapy water. Rinse thoroughly and air dry.
4. **Descaling:** Mineral deposits (limescale) may build up in the heating chamber over time. To descale, mix 50ml of white vinegar with 100ml of water and pour it into the heating chamber. Let it stand for 30 minutes to 1 hour, then pour out the solution and rinse thoroughly with clean water. Repeat if necessary.

## 7. TROUBLESHOOTING

---

If you encounter any issues, please refer to the following common problems and solutions:

- **Appliance not turning on:** Ensure the power cord is securely plugged into a working electrical outlet. Check if the power button has been pressed.
- **Milk not heating properly:** Verify that the correct amount of water has been added to the heating chamber. Ensure the selected function and temperature settings are appropriate for the contents.
- **Automatic shut-off engaging too soon:** This may indicate insufficient water in the heating chamber. Add more water and restart the cycle.
- **Excessive limescale buildup:** Perform descaling as described in the Maintenance and Cleaning section.

If the problem persists, please contact customer support.
