## SETUP

Follow these steps to connect your pTron TagNet X1 to your iOS device:

1. **Activate the TagNet X1:** Press the button on the TagNet X1 device. The locator will beep, indicating it is ready for pairing.
2. **Open Find My App:** On your iOS device, open the pre-installed 'Find My' app and ensure Bluetooth is turned on.
3. **Add New Item:** In the 'Find My' app, tap the '+' icon and select 'Add Item'.
4. **Select Other Item:** Choose the 'Other Item' option from the list.
5. **Connect to PBX Finder:** Your device will detect the 'PBX Finder'. Tap 'Connect'.
6. **Complete Setup:** Rename your TagNet X1 device as desired and tap 'Agree' to link it to your Apple ID and finish the setup process.

## OPERATING INSTRUCTIONS

### Locating Your Item

Once connected, you can locate your item using the 'Find My' app:

- **Play Sound:** Open the 'Find My' app, select your TagNet X1, and tap 'Play Sound'. The device will emit an 80dB buzzer sound, helping you find it if it's nearby.

## 80dB Sound Alert

Emits a Loud Sound that You Can Trigger via Find My App

Image: The 80dB sound alert feature of the pTron TagNet X1, triggered via the Find My app.

### Left Behind Reminder

Receive instant notifications if you accidentally leave your item behind:

- The 'Find My' app will alert you on your iPhone whenever your TagNet X1 disconnects from Bluetooth range, indicating the item has been left behind.

# Left Behind Reminder

Get notified on your iPhone whenever your item disconnects from Bluetooth range.

Image: The 'Left Behind Reminder' feature notifies you when your item disconnects from your iPhone's Bluetooth range.

## Lost Mode

If your item is lost, activate Lost Mode in the 'Find My' app to:

- Receive notifications when your item is detected by another device on the Find My network.
- View your item's last known location on a map.

## Shared Tracking

The TagNet X1 supports shared tracking, allowing multiple users to locate an item:

- Group members can view the item's location, play a sound, and use precise tracking to find it easily.

# Shared Tracking for Groups

Group members can locate the item, make it play a sound, and use precise tracking to find it easily.

## MAINTENANCE

### Battery Replacement

The pTron TagNet X1 uses a replaceable coin battery with an average life of 1 year. When the battery is low, you will receive a notification on your iOS device. To replace the battery:

1. Carefully open the TagNet X1 casing.
2. Remove the old coin battery.
3. Insert a new compatible coin battery, ensuring correct polarity.
4. Close the casing securely.

### Cleaning

Wipe the device with a soft, dry cloth. Avoid using harsh chemicals or abrasive materials, as these can damage the device.

## TROUBLESHOOTING

Problem	Possible Solution
Device not pairing with iPhone	<ul style="list-style-type: none"><li>• Ensure Bluetooth is enabled on your iPhone.</li><li>• Make sure the TagNet X1 is within Bluetooth range of your iPhone.</li><li>• Press the button on the TagNet X1 to ensure it is in pairing mode.</li><li>• Restart your iPhone and try pairing again.</li><li>• Check the battery level of the TagNet X1.</li></ul>
Buzzer not sounding	<ul style="list-style-type: none"><li>• Ensure the TagNet X1 has sufficient battery power.</li><li>• Verify that the device is connected to your iPhone via the 'Find My' app.</li><li>• Check your iPhone's volume settings.</li></ul>
Location not updating or inaccurate	<ul style="list-style-type: none"><li>• Ensure your iPhone has an active internet connection (Wi-Fi or cellular data).</li><li>• Verify that Location Services are enabled for the 'Find My' app on your iPhone.</li><li>• The accuracy of location depends on the density of the Apple Find My network in the area.</li></ul>
Device disconnects frequently	<ul style="list-style-type: none"><li>• Ensure the TagNet X1 is kept within the optimal Bluetooth range of your iPhone.</li><li>• Avoid placing the device in areas with significant signal interference.</li><li>• Check for any available software updates for your iOS device.</li></ul>
