HABIUBIU HCLH1

HABIUBIU HCLH1 Cordless Wet Dry Vacuum Cleaner Instruction Manual

Model: HCLH1

1. Safety Information

Please read this instruction manual carefully before using the HABIUBIU HCLH1 Wet Dry Vacuum Cleaner. Keep this manual for future reference. Failure to follow these instructions may result in electric shock, fire, or serious injury.

- Ensure the power supply voltage matches the specifications indicated on the charging dock.
- Do not immerse the main unit, power cord, or charging dock in water or other liquids.
- Keep hair, loose clothing, fingers, and all parts of the body away from openings and moving parts.
- Do not use to pick up flammable or combustible liquids, such as gasoline, or use in areas where they may be present.
- Do not pick up anything that is burning or smoking, such as cigarettes, matches, or hot ashes.
- Always turn off the appliance before connecting or disconnecting the charging dock.
- Use only as described in this manual. Use only manufacturer's recommended attachments.
- Do not use without tanks and filters in place.

2. Product Overview

The HABIUBIU HCLH1 is a versatile cordless wet dry vacuum cleaner designed for efficient cleaning of hard floors. It combines vacuuming and mopping in one step, featuring self-cleaning and hot-air drying functions for convenience.

Included Components:

- Main Unit (Vacuum Mop)
- Handle
- Charging Dock
- Clean Water Tank (800mL)
- Dirty Water Tank (750mL)
- Roller Brush

- HEPA Filter
- Cleaning Solution
- Cleaning Tool
- Wrench
- User Manual

3. Setup

3.1 Assembling the Unit

1. Carefully remove all components from the packaging.
2. Insert the handle into the main unit until you hear a 'click' sound, indicating it is securely locked in place.
3. Place the charging dock in a convenient location near a power outlet.

3.2 Charging the Unit

- Place the assembled vacuum cleaner onto the charging dock.
- Ensure the charging contacts on the unit align with those on the dock.
- Plug the charging dock into a power outlet. The display will indicate charging status.
- Fully charge the unit before first use (approximately 4-5 hours).

3.3 Filling the Clean Water Tank

- Press the release button on the clean water tank and pull it out from the main unit.
- Open the tank cap and fill with clean tap water. You may add the provided cleaning solution according to the instructions on the bottle.
- Close the tank cap securely and reinsert the clean water tank into the main unit until it clicks into place.

3.4 Inserting the Dirty Water Tank

- Ensure the dirty water tank (750mL capacity) is empty and the HEPA filter is correctly installed.
- Insert the dirty water tank into its designated slot on the main unit until it clicks securely.

4. Operation

4.1 Powering On/Off and Mode Selection

- To power on, press the power button on the handle. The LED display will illuminate.
- Press the mode selection button (gear icon) on the handle to cycle through available cleaning modes: Standard, Quick-Dry (55 min), Powerful (45 min), Quiet (75 min), and Smart mode.
- In Smart mode, the vacuum automatically adjusts suction power and water flow based on detected dirt levels.
- To power off, press and hold the power button.

4.2 Cleaning Flexibility

- **180° Lay-Flat Design:** The unit can lay flat at a 180° angle, allowing it to easily reach under low furniture like beds and sofas for thorough cleaning.
- **45° Swivel Steering:** Utilize the 45° swivel steering for enhanced maneuverability around obstacles and into tight corners.
- **Dual Side Edge Cleaning:** The dual side edge brush design ensures deep cleaning right up against baseboards and into corners, leaving no dirt behind.
- **LED Headlight:** A green LED headlight illuminates hidden dust and debris on the floor, ensuring a comprehensive clean.

5. Maintenance

5.1 One-Touch Self-Cleaning & Hot-Air Drying

- After cleaning, return the vacuum cleaner to its charging dock.
- Press the self-cleaning button (usually indicated by a water droplet icon) on the handle or base.
- The system will use 167°F hot water to deeply rinse the roller brush, dissolving dirt and grease.
- This is followed by a 185°F hot-air drying process, completing in about 5 minutes, ensuring the roller is dry and odor-free.

Figure 4: The one-touch self-cleaning and hot-air drying function for the roller brush.

5.2 Emptying and Cleaning the Dirty Water Tank

- After each use, remove the dirty water tank from the unit.
- Carefully empty the dirty water and debris into a sink or toilet.
- Rinse the tank thoroughly with clean water.
- Ensure the tank is completely dry before reinserting it into the unit to prevent odors.

5.3 Cleaning/Replacing the HEPA Filter

- The HEPA filter is located within the dirty water tank assembly.
- Remove the filter and rinse it under running water. Allow it to air dry completely before reinstallation.
- It is recommended to replace the HEPA filter every 6 months for optimal performance.

5.4 Cleaning the Roller Brush (Anti-Tangle Design)

- The dual-layer comb design effectively prevents hair from tangling around the roller brush.

- During self-cleaning, the combs continuously remove hair and pet fur, directing them into the wastewater tank.
- Periodically inspect the roller brush for any remaining debris or hair and remove manually if necessary using the provided cleaning tool.

Figure 5: The advanced anti-tangle design of the roller brush, ideal for pet owners.

6. Troubleshooting

If you encounter any issues with your HABIUBIU HCLH1, please refer to the following common troubleshooting steps:

Problem	Possible Cause	Solution
No Power	Battery is depleted.	Place unit on charging dock and allow to fully charge.
Low Suction	Dirty water tank is full or clogged. HEPA filter is clogged. Roller brush is tangled.	Empty and clean dirty water tank. Clean or replace HEPA filter. Clean roller brush.

Problem	Possible Cause	Solution
Water Leakage	Water tanks not properly installed. Tank caps not sealed.	Ensure both clean and dirty water tanks are securely clicked into place. Check that all caps are tightly sealed.
Unpleasant Odor	Dirty water tank not cleaned. Roller brush not dried properly.	Empty and thoroughly clean dirty water tank after each use. Run self-cleaning cycle to dry roller brush.
