OPERATING INSTRUCTIONS

Height Adjustment

To adjust the chair's height, locate the lever on the right side beneath the seat. Pull the lever upwards while applying or releasing body weight to move the seat up or down. Release the lever to lock the height in place.

Recline Function

The multi-tilt mechanism allows reclining from 90° to 145°. To recline, pull the lever on the left side of the seat upwards and lean back to your desired angle. Release the lever to lock the backrest position. To return to an upright position, pull the lever and lean forward.

Retractable Footrest

For enhanced relaxation, pull the footrest out from beneath the seat. It extends to provide leg support when reclining. Push it back in when not in use.

Shiatsu Neck Massager

The headrest features a built-in Shiatsu massager with 3-speed intensity and heat function. Connect the USB cable from the headrest to a power source (e.g., USB port on a computer or a power bank) to activate. Controls are typically located on the massager unit itself.
