ACTIVLIFE 6685139

ACTIVLIFE Primer Bulb for Hitachi 6685139 Instruction Manual

Model: 6685139

INTRODUCTION

This instruction manual provides essential information for the proper installation, operation, and maintenance of your ACTIVLIFE Primer Bulb, designed for compatibility with Hitachi 6685139 models of trimmers, leaf blowers, and chainsaws. The primer bulb is a crucial component for ensuring efficient fuel delivery and reliable starting of your small engine equipment.

SAFETY INFORMATION

Always prioritize safety when working with fuel and power tools. Read and understand all safety warnings in your equipment's primary manual before attempting any installation or maintenance.

- Ensure the engine is off and cool before beginning any work.
- Disconnect the spark plug wire to prevent accidental starting.
- Work in a well-ventilated area.
- Wear appropriate personal protective equipment, such as gloves and eye protection.
- Handle fuel with extreme care. Avoid spills and open flames.
- Keep children and pets away from the work area.

PACKAGE CONTENTS

Your package should contain the following item:

- 1 x ACTIVLIFE Primer Bulb (compatible with Hitachi 6685139)

Image 1: The ACTIVLIFE Primer Bulb. This component is designed to draw fuel into the carburetor for easier engine starting.

SETUP AND INSTALLATION

This primer bulb is designed for straightforward replacement. Follow these steps for proper installation:

1. **Prepare the Equipment:** Ensure your trimmer, leaf blower, or chainsaw is turned off, the engine is cool, and the spark plug wire is disconnected.
2. **Locate the Old Primer Bulb:** Identify the existing primer bulb on your equipment. It is typically a small, clear or translucent bulb connected to fuel lines.
3. **Disconnect Fuel Lines:** Carefully disconnect the fuel lines attached to the old primer bulb. Be prepared for a small amount of fuel leakage. Use a rag to catch any drips. Note the orientation of the fuel lines for correct reattachment.
4. **Remove Old Bulb:** Gently pry or unclip the old primer bulb from its housing. Some models may require a small screwdriver.
5. **Install New Bulb:** Insert the new ACTIVLIFE Primer Bulb into the housing, ensuring it seats securely.
6. **Reconnect Fuel Lines:** Reattach the fuel lines to the new primer bulb in their original configuration. Ensure all connections are snug to prevent fuel leaks.
7. **Inspect for Leaks:** After installation, visually inspect all connections for any signs of fuel leakage. Tighten connections if necessary.

This bulb pump is a vital component to maintain optimal performance and functionality of your equipment, ensuring quick and reliable starts.

OPERATING THE PRIMER BULB

The primer bulb's function is to draw fuel from the tank into the carburetor, expelling air and preparing the engine for starting. This process is known as priming.

1. **Fill Fuel Tank:** Ensure your equipment's fuel tank contains the appropriate fuel mixture.
2. **Press the Primer Bulb:** Repeatedly press the primer bulb with your thumb. You should observe fuel flowing through the clear fuel lines and into the carburetor.
3. **Observe Fuel Flow:** Continue pressing until you see fuel in the bulb and any air bubbles are expelled. Typically, 5-10 presses are sufficient, but refer to your equipment's primary manual for specific recommendations.
4. **Start Engine:** Once primed, follow your equipment's standard starting procedure.

Efficiently priming your equipment with this bulb pump ensures quick and reliable starts for your trimmer, leaf blower, or chainsaw.

MAINTENANCE

Regular inspection of your primer bulb can help prevent starting issues.

- **Visual Inspection:** Periodically check the primer bulb for any signs of cracking, hardening, or discoloration. A damaged bulb will not prime effectively.
- **Check for Leaks:** Ensure all fuel line connections to the primer bulb are secure and free of leaks.
- **Replacement:** If the primer bulb shows signs of wear, damage, or fails to prime the engine, replace it promptly with a compatible part.

TROUBLESHOOTING

If you encounter issues with your equipment's starting, consider the following troubleshooting steps related to the primer bulb:

- **Engine Not Priming/Starting:**
 - Check fuel level in the tank.
 - Inspect the primer bulb for cracks or holes. A damaged bulb cannot create suction.
 - Ensure fuel lines are correctly connected and not kinked or blocked.
 - Verify that the primer bulb is securely seated in its housing.
- **Fuel Leaks Around Primer Bulb:**
 - Check the tightness of fuel line connections.
 - Inspect the primer bulb for cracks or damage. Replace if necessary.
 - Ensure the bulb is properly seated in its housing.

If issues persist after troubleshooting, consult a qualified service technician or refer to your equipment's main service manual.

SPECIFICATIONS

Manufacturer	ACTIVLIFE
Model Number (Compatible)	6685139
Compatibility	Hitachi Trimmers, Leaf Blowers, Chainsaws (models using 6685139 primer bulb)

WARRANTY AND SUPPORT

For specific warranty information regarding your ACTIVLIFE Primer Bulb, please refer to the product packaging or contact ACTIVLIFE customer support directly. If you require technical assistance or have questions not covered in this manual, please reach out to the manufacturer or your retailer.
