SETUP

Package Contents

- Corsair K55 RGB PRO Gaming Keyboard

Connecting the Keyboard

Connect the USB-A cable from the keyboard to an available USB port on your PC, Mac, or compatible gaming console. The keyboard is plug-and-play for basic functionality.

Software Installation (iCUE)

For advanced customization, including dynamic RGB lighting effects, macro programming, and key remapping, download and install the Corsair iCUE software from the official Corsair website. iCUE is compatible with Windows operating systems (Windows 11 and newer recommended).

OPERATING INSTRUCTIONS

Dynamic RGB Backlighting

The K55 RGB PRO features five customizable RGB lighting zones. You can cycle through six onboard lighting effects using the dedicated lighting control key on the keyboard. For full customization, including assigning specific colors to zones and creating custom effects, use the Corsair iCUE software.

DYNAMIC FIVE-ZONE RGB BACKLIGHTING

Display your own custom lighting effects.

6
Onboard Lighting Effects

Control RGB backlighting, program macros, remap keys, and more with CORSAIR iCUE software.

Dedicated Macro Keys

The keyboard includes six dedicated macro keys (G1-G6) on the left side. These keys can be programmed to activate functions, shortcuts, or complex keypress sequences. Macros can be set up through the Corsair iCUE software or integrated with Elgato Stream Deck software for instant streaming commands.

SIX DEDICATED MACRO KEYS

Set up powerful macros and remap keys in iCUE software or create multi-action shortcuts through Elgato Stream Deck software.

Dedicated Media and Volume Keys

Convenient media keys are located above the function row, allowing you to control playback (play/pause, stop, skip track) and adjust volume on-the-fly without interrupting your activity. A Windows Key Lock Mode button is also present to prevent accidental presses during gaming.

Detachable Palm Rest

The keyboard includes a soft rubber detachable palm rest. This accessory is designed to reduce stress on your hands and wrists during extended use, providing enhanced comfort. The textured surface helps prevent hands from slipping.

QUIET AND RESPONSIVE KEYS

For comfortable typing during both work and play.

MAINTENANCE

Cleaning

To clean your keyboard, disconnect it from your computer. Use a soft, lint-free cloth lightly dampened with water or a mild cleaning solution. Avoid harsh chemicals or abrasive materials. For dust and debris between keys, use compressed air.

Spill Resistance

The Corsair K55 RGB PRO is certified with IP42 dust and spill resistance. This rating indicates protection against solid objects larger than 1mm and vertically falling water drops when the enclosure is tilted up to 15 degrees. While it offers protection against minor spills, it is not fully waterproof. In case of a spill, immediately disconnect the keyboard and allow it to dry completely before reconnecting.

DUST AND SPILL-RESISTANCE

IP42 protection guards against accidents
so your gameplay never has to stop.

TROUBLESHOOTING

Issue	Possible Solution
Keyboard not recognized or not functioning.	Ensure the USB cable is securely connected to both the keyboard and the computer. Try a different USB port. Restart your computer.
Keys are not responding.	Check for physical obstructions under the keys. Ensure the keyboard is clean. If using iCUE, verify key assignments.
RGB lighting is not working or incorrect.	Ensure iCUE software is installed and up to date. Check lighting profiles within iCUE. Try cycling through onboard lighting effects using the dedicated key.
Macro keys not functioning.	Verify macro assignments in Corsair iCUE software. Ensure iCUE is running in the background.

Issue	Possible Solution
Windows Key is disabled.	Press the Windows Key Lock Mode button (usually indicated by a lock icon) to enable/disable the Windows key.

SPECIFICATIONS

Feature	Detail
Brand	Corsair
Model Name	K55 RGB PRO
Model Number	CH-9226765-AS
