AFEXOA NC-01

AFEXOA RGB Night Light Alarm Clock (Model NC-01) User Manual

Your guide to setting up and operating your new alarm clock.

1. PRODUCT OVERVIEW

The AFEXOA RGB Night Light Alarm Clock (Model NC-01) combines a digital alarm clock with a versatile night light, featuring an hourglass design. It offers multiple wake-up sounds, adjustable volume, snooze functionality, and various lighting modes including warm white and 7 RGB ambient colors. It also includes a sleep timer for convenience.

3. SETUP GUIDE

3.1. Charging the Device

Before first use, fully charge the alarm clock using the provided Type-C USB cable. Connect the cable to the charging port on the device and a compatible USB power adapter (not included). The charging indicator will show the charging status.

3.2. Initial Power On

Once charged, the device should power on automatically. If not, locate the power button (usually on the base) and press it to turn on the device.

3.3. Setting the Time (12/24H Format)

Refer to the quick start guide or the device's base for specific buttons to set the time. Typically, there will be a 'Time Set' button or a combination of 'M' (Mode) and '+' / '-' buttons. You can switch between 12-hour and 24-hour formats as desired.

Image: The alarm clock's digital display showing time in both 12-hour (AM/PM) and 24-hour formats, illustrating the time setting feature.

4. OPERATING INSTRUCTIONS

4.1. Alarm Clock Functions

To set an alarm:

1. Press the 'Alarm' button (or 'M' button until alarm mode is selected).
2. Use the '+' and '-' buttons to adjust the desired alarm time.
3. Confirm the time setting.
4. Select from 7 available wake-up sounds (e.g., beep, bird, piano, soft music).
5. Adjust the alarm volume from 8 levels to suit your preference. The alarm sound will gradually increase in volume to provide a gentle wake-up.

Dimmable Night Light

Touch on the top for 2 seconds to adjust your desired brightness

4.2. Snooze Function

When the alarm sounds, gently touch or tap the top surface of the alarm clock to activate the snooze function. This

will provide an additional 9 minutes of sleep time. The snooze function can be used multiple times. If no operation is detected within 20 minutes of the alarm sounding, the alarm will automatically turn off.

4.4. RGB Ambient Lights

The alarm clock features 7 RGB ambient light colors and a flowing light effect. You can select your favorite light mode to create a specific atmosphere. There are 3 adjustable brightness levels for the RGB lights. Consult the quick start guide for specific button presses to cycle through modes and adjust brightness.

Show' feature.

4.5. Sleep Timer

The sleep timer allows you to set a duration (from 5 to 90 minutes) after which the lights will automatically turn off. During the timer, you can choose from four static light colors: white, red, blue, and green. This feature is designed to aid sleep by gradually dimming or turning off the light.

5. MAINTENANCE

5.1. Cleaning

To clean the alarm clock, gently wipe its surface with a soft, dry, or slightly damp cloth. Do not use abrasive cleaners, solvents, or immerse the device in water.

5.2. Battery Care

The device is powered by a built-in Lithium Ion battery. For optimal battery life, avoid fully discharging the battery frequently and store the device in a cool, dry place when not in use for extended periods. Do not attempt to replace the battery yourself.

6. TROUBLESHOOTING

- **Device does not power on:** Ensure the device is fully charged using the provided Type-C cable. Check if the power button is pressed.
- **Alarm does not sound:** Verify that the alarm is set correctly and enabled. Check the alarm volume level.
- **Lights are not working:** Ensure the device is powered on. Check if the light mode is selected and brightness is adjusted.
- **Time display is incorrect:** Re-enter the time settings as described in Section 3.3.
- **Snooze function not responding:** Ensure you are tapping the designated touch area on the top of the device.
