5. OPERATING INSTRUCTIONS

5.1 360° Swivel Function

The tabletop and side shelving unit are designed to swivel 360 degrees relative to the main storage cabinet. To rotate, gently push or pull the side unit or tabletop in the desired direction. Ensure there are no obstructions in the path of rotation. This allows for flexible configurations, transforming the unit from a compact cabinet to an extended dining table or bar.

5.2 Adjustable Length

By utilizing the 360° swivel, the table's length can be adjusted. When the side unit is fully extended perpendicular to the main cabinet, it creates a longer surface. When rotated parallel, it becomes more compact. Experiment with different angles to find the optimal setup for your space and needs.

5.3 Storage Compartments

Utilize the various storage options:

- **Open Shelves:** Ideal for displaying decorative items, frequently used bottles, or books.
- **Glass-Front Cabinets:** Store items you wish to protect from dust while keeping them visible, such as glassware or special bottles.
- **Closed Drawers:** Perfect for organizing smaller items, cutlery, or anything you prefer to keep out of sight.
