## 6. MAINTENANCE

To ensure the longevity and appearance of your LIKIMIO bed frame, follow these maintenance guidelines:

- **Cleaning:** For the metal frame, wipe with a soft, damp cloth. For the upholstered headboard, use a fabric cleaner suitable for the material, testing on an inconspicuous area first. For wooden surfaces, wipe with a dry or slightly damp cloth. Avoid harsh chemicals.
- **Tightening:** Periodically check all bolts and screws and re-tighten them to maintain structural integrity and prevent squeaking.
- **Drawer Care:** Keep the drawer wheels free of debris to ensure smooth operation.
- **Charging Station:** Ensure the charging station is kept dry and free from dust. Do not overload the outlets.

## 7. TROUBLESHOOTING

If you encounter any issues with your bed frame, please refer to the following common solutions:

Problem	Possible Cause	Solution
Bed frame squeaks	Loose bolts or connections.	Check and tighten all bolts and screws. Ensure all parts are correctly aligned.
Drawers do not stay closed or slide out easily	Drawers are not on tracks; they roll freely. Obstruction in the path.	The drawers are designed to roll on the floor and are not fixed. Ensure the floor is clear. Some users have found leaving a screw slightly longer on one side can help keep them in place if not needed daily.
Mattress does not fit perfectly or leaves a gap at the headboard	Mattress dimensions vary.	Ensure your mattress is the correct King size. A thicker mattress (e.g., 14-inch) may fit more snugly against the headboard. Pillows can also fill any small gaps.
Charging station not working	Power cord not connected or faulty device.	Ensure the power cord for the charging station is securely plugged into a wall outlet. Test with different devices or a different outlet.

If the problem persists, please contact LIKIMIO customer support.
