Generic Remote Control Waterproof Rechargeable Electronic Pet Training Collar Model 880-1 User Manual

Brand: Generic | Model: 880-1

1. INTRODUCTION

Thank you for choosing the Generic Remote Control Waterproof Rechargeable Electronic Pet Training Collar Model 880-1. This device is designed to assist in training your pet effectively and humanely, helping to correct undesirable behaviors and reinforce positive commands. It features four distinct training modes, adjustable intensity levels, and a long operational range, making it suitable for various training environments.

Please read this manual thoroughly before use to ensure proper operation, maximize the product's lifespan, and ensure the safety and comfort of your pet.

2. PACKAGE CONTENTS

Upon opening your package, please ensure all the following components are present:

- Remote Control Transmitter
- Receiver Collar
- Adjustable Nylon Collar Strap
- Conductive Silicone Caps (set of 4)
- Test Light
- Universal USB Charging Cable
- User Manual (this document)

Image 2.1: A visual representation of all items included in the package: Remote Control, Receiver, Conductive Silicone, Test Light, USB Cable, Nylon Collar, and User Manual.

3. SETUP AND INITIAL USE

3.1 Charging the Devices

Before first use, fully charge both the remote control and the receiver collar. The universal USB charging cable allows you to charge both devices simultaneously.

1. Connect the USB charging cable to the charging ports on both the remote control and the receiver collar.
2. Plug the USB cable into a compatible USB power adapter (not included) or a computer USB port.
3. Charging indicators will illuminate. Allow approximately 2 hours for a full charge.
4. Once fully charged, the devices can operate for 15-20 days, depending on usage.

3.2 Fitting the Collar

Proper fit of the receiver collar is crucial for effective operation and your pet's comfort.

1. Attach the receiver unit to the nylon collar strap.
2. Place the collar around your dog's neck, ensuring the contact points touch the skin.
3. Adjust the nylon strap to a snug fit. You should be able to fit two fingers comfortably between the collar and your dog's neck. The collar is adjustable for neck sizes from 6 cm to 25 cm, suitable for dogs weighing 7 kg to 50 kg.
4. Avoid overtightening, as this can cause skin irritation. A loose collar will prevent consistent contact and reduce effectiveness.

3.3 Pairing the Remote and Receiver

The remote control and receiver collar are typically pre-paired. If they do not connect, follow these steps:

1. Ensure both devices are charged and powered on.
2. Press and hold the power button on the receiver collar until the indicator light flashes rapidly.
3. Within 10 seconds, press a training mode button (e.g., Vibration or Sound) on the remote control.
4. If pairing is successful, the receiver's indicator light will stop flashing and remain solid, or emit a confirmation sound.

4. OPERATING INSTRUCTIONS

4.1 Training Modes

The training collar offers four distinct modes to address various training needs:

- **Strong Vibration:** Delivers a more intense vibration for stubborn behaviors.
- **Vibration:** Provides a standard vibration stimulus.
- **Light:** Activates an LED light on the receiver, useful for locating your pet in low light conditions.
- **Sound:** Emits an audible tone.

The vibration modes (Strong Vibration and Vibration) have adjustable intensity levels from 0 to 99, allowing you to customize the stimulus to your dog's temperament and the specific training situation. Use the '+' and '-' buttons on the remote to adjust the intensity.

QUATRO MODOS DE TREINO

Image 4.1: The four training modes (Light, Sound, Vibration) available on the remote control and receiver.

4.2 Operational Range

The training collar system provides an extensive operational range of up to 800 meters (approximately 2600 feet) in open areas. This allows for flexible training in various environments such as your backyard, a park, or other open spaces.

Note that obstacles like buildings, dense foliage, or uneven terrain can reduce the effective range. For optimal performance, maintain a clear line of sight between the remote control and the receiver collar.

ALCANCE DE 795 METROS

ATÉ 795 METROS

106 METROS
SEM OBSTÁCULOS

Image 4.2: The remote control's long-range capability, demonstrating effective distance in open areas and reduced range with obstructions.

4.3 Automatic Standby Mode

To conserve battery life, both the remote control and the receiver collar will enter a standby mode if there is no operation for 5 minutes. To reactivate, simply press any button on the remote control.

5. MAINTENANCE AND CARE

5.1 Charging

Regularly charge your devices to ensure they are ready for use. A full charge takes approximately 2 hours and provides 15-20 days of operation.

5.2 Water Resistance

The receiver collar is designed to be waterproof and can be used in damp weather or during water play. However, it is not recommended to use the collar when your dog is swimming, as prolonged submersion may affect its performance or cause discomfort to your pet.

DESIGN TOTALMENTE À PROVA DE ÁGUA

O SEU CÃO PODE NADAR, TOMAR BANHO OU PASSEAR À CHUVA.

Image 5.1: The waterproof design of the collar, suitable for wet conditions like rain or water play, but not for swimming.

5.3 Cleaning and Storage

Clean the collar and remote control regularly with a damp cloth. Ensure the contact points on the receiver are clean to maintain proper function. Store the device in a dry place when not in use.

6. TROUBLESHOOTING

- **Device not responding:** Check battery levels of both remote and receiver. Ensure they are charged and powered on. Re-pair the devices if necessary (refer to Section 3.3).
- **Collar not delivering stimulus:** Verify the collar is properly fitted and the contact points are touching your dog's skin. Ensure the intensity level is set above 0. Use the test light to confirm the receiver is functioning.
- **Short battery life:** Ensure both devices are fully charged for 2 hours. Frequent use of higher intensity settings or continuous operation may reduce battery life. The automatic standby mode helps conserve power.
- **Reduced range:** Ensure there are no significant obstacles between the remote and the receiver. Move to an open area to test the full range.

The image shows a black and yellow dog training collar system. A handheld remote with a blue LCD screen displaying '98' and several control buttons (power, vibration, sound, volume, channel, and light) is positioned in the center. To its left is the black receiver collar with two contact points. To its right is a small, happy-looking dog wearing the same collar. The background is a blurred outdoor scene with green grass and trees.

Image 7.1: Key technical specifications of the training collar system.

Feature	Detail
Model Number	880-1
Training Modes	Strong Vibration, Vibration, Light, Sound
Vibration Levels	0-99 Adjustable
Operational Range	Up to 800 meters (open area)
Battery Type	Rechargeable (Non-standard batteries included)
Charging Time	Approx. 2 hours
Operating Time	15-20 days (after full charge)
Water Resistance	Waterproof (not recommended for swimming)
Collar Material	Acrylonitrile Butadiene Styrene, Nylon

Recommended Dog Size	Medium to Large (7 kg to 50 kg)
Neck Size Range	6 cm to 25 cm
Package Dimensions	16.7 x 14.9 x 5.4 cm
Package Weight	260 g

8. SAFETY GUIDELINES AND IMPORTANT INFORMATION

- This training collar is recommended for **medium to large dogs**, specifically those weighing between 7 kg and 50 kg.
- Ensure the collar is fitted correctly. It should be snug enough for the contact points to touch the skin, but loose enough to allow two fingers to fit underneath.
- Do not leave the collar on your dog for more than 12 consecutive hours to prevent skin irritation.
- Regularly check your dog's neck for any signs of skin irritation or sores. If irritation occurs, discontinue use until the skin heals.
- While the collar is waterproof for damp conditions and water play, it **is not recommended for use while your dog is swimming**.
- This device is a training aid and should be used responsibly and humanely. It is not intended to punish or harm your pet.
- Keep the remote control and receiver out of reach of children.

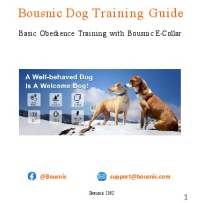

9. WARRANTY AND SUPPORT

Specific warranty information for this product is not provided in this manual. For details regarding warranty coverage, returns, or technical support, please refer to the purchase documentation or contact the seller/manufacturer directly.

Always retain your proof of purchase for any warranty claims.
