2. Product Features

- **Deformability:** Constructed with polyester and internal iron wire, this bow resists wrinkling and deformation. It can be reshaped and returns to its original form even after storage.

- **Wire Lined:** The internal wire is fully encased in high-quality fabric, ensuring no exposed metal. This design provides a balance of soft texture and rigid structure for flexible decoration.

4. Setup and Installation

1. **Unpacking:** Carefully remove the bow from its packaging. Due to shipping, the bow may appear compressed or wrinkled.
2. **Reshaping:** Gently fluff and shape the bow to achieve the desired volume. The internal wire allows for easy

manipulation and retention of shape. If significant wrinkles are present, a low-heat iron can be used with caution, preferably with a protective cloth.

3. **Attachment:** The bow is equipped with ties or an integrated wire system for secure attachment. For Christmas trees, position the bow at the top or desired location and use the ties/wire to secure it to a sturdy branch. For walls, doors, or other surfaces, use appropriate hooks or fasteners (not included) in conjunction with the bow's attachment points.
