6. MAINTENANCE

6.1 Cleaning

- For general cleaning, wipe the wood surfaces with a soft, damp cloth.
- Avoid using harsh chemicals, abrasive cleaners, or polishes that may damage the finish.
- Promptly wipe up any spills to prevent staining.

6.2 Fastener Checks

- Periodically (e.g., every 3-6 months), check all bolts, screws, and connections to ensure they remain tight.
- Re-tighten any loose fasteners to maintain the bed's stability and structural integrity. Do not overtighten.

7. TROUBLESHOOTING

7.1 Squeaking Noises

- **Cause:** Loose fasteners or friction between wood components.
- **Solution:** Check and tighten all assembly bolts and screws. If squeaking persists, apply a small amount of paraffin wax or silicone spray to contact points between slats and side rails.

7.2 Drawers Sticking or Not Sliding Smoothly

- **Cause:** Overloaded drawers, debris in the tracks, or misaligned casters.
- **Solution:** Reduce the weight in the drawers. Clean any dust or debris from the caster wheels and the area they roll on. Check if the casters are properly attached and aligned.

7.3 Trundle Not Moving Easily

- **Cause:** Obstruction, uneven flooring, or issues with trundle casters.
- **Solution:** Ensure no objects are blocking the trundle's path. Verify the bed is on a level surface. Check trundle casters for debris or damage; clean or replace if necessary.
