## Garvee B0FXGP44LN

# Garvee Shower Base 60" x 32" with Stainless Steel Center Drain

## INSTRUCTION MANUAL

Model: B0FXGP44LN

### 1. Introduction

---

Thank you for choosing the Garvee Shower Base. This manual provides essential information for the safe and proper installation, operation, and maintenance of your new shower base. Please read all instructions carefully before beginning installation and retain this manual for future reference.

### 2. Product Features

---

- **Anti-Clogging Drain:** Equipped with a durable 304 stainless steel strainer, designed to trap hair and debris effectively without impeding water flow. This strainer offers superior rust resistance compared to plastic alternatives.
- **Non-Slip Safety Surface:** Features a grid texture that enhances grip, even when wet, significantly reducing the risk of slips. Integrated water channels efficiently guide water to the drain.
- **Durable Construction:** Constructed from heavy-duty resin with internal reinforcement ribs to prevent cracking. The base is tested to support up to 2,500 pounds. Its glossy finish is designed to resist stains and yellowing over time.
- **Versatile Sizing:** Available in 32"x60" and 32"x48" dimensions to accommodate various bathroom layouts. The low 3.5" profile is suitable for tub-to-shower conversion projects.
- **Easy Installation:** Includes a pre-attached drain compatible with most US plumbing pipes. The kit provides sealant, adjustable feet for leveling, and leak-proof gaskets to simplify the installation process.

### 3. Safety Information

---

- Always wear appropriate personal protective equipment (PPE) during installation, including safety glasses and gloves.
- Ensure the installation area is well-ventilated.
- Verify that all plumbing connections are secure and leak-free before using the shower.
- Do not stand on the shower base during installation unless specifically instructed and supported.
- Keep children and pets away from the installation area.
- If you are unsure about any step of the installation process, consult a qualified professional.

## 4. Package Contents

---

The Garvee Shower Base package includes the following components:

- Garvee Shower Base (60" L x 32" W)
- 304 Stainless Steel Drain Strainer (pre-installed or included separately)
- Sealant
- Adjustable Feet
- Leak-proof Gaskets

## 5. Setup and Installation

---

Proper installation is crucial for the longevity and performance of your shower base. Follow these steps carefully:

1. **Preparation:** Clear the installation area of any debris. Ensure the subfloor is level, clean, and structurally sound. Gather all necessary tools (e.g., level, measuring tape, caulk gun, wrench).
2. **Positioning and Leveling:** Carefully place the shower base in its intended position. Use the adjustable feet to ensure the base is perfectly level in all directions. Verify with a spirit level.
3. **Drain Connection:** The shower base comes with a pre-attached drain. Connect the drain to your existing plumbing system. Apply sealant and use the provided leak-proof gaskets to ensure a watertight seal. Tighten all connections securely but do not overtighten.
4. **Sealing Edges:** Once the base is level and the drain is connected, apply a continuous bead of sealant along all edges where the shower base meets the wall and floor. This prevents water from seeping underneath.
5. **Curing Time:** Allow the sealant to cure completely according to the manufacturer's instructions (typically 24 hours) before using the shower. This ensures a strong, waterproof bond.

## 6. Operating Instructions

---

The Garvee Shower Base is designed for immediate use after proper installation and curing of sealants. Its non-slip textured surface provides enhanced safety during showering. Ensure the drain strainer is in place to prevent clogs.

## ANTI-CLOGGING & NON-RUST

Shower Base with Drain strainer We have equipped you with Stainless Steel Strainer

## 7. Maintenance

---

To maintain the appearance and functionality of your Garvee Shower Base, follow these simple maintenance guidelines:

- **Regular Cleaning:** Clean the shower base regularly with mild soap and water. Avoid abrasive cleaners, harsh chemicals, or scouring pads, as these can damage the glossy finish and non-slip texture.
- **Drain Maintenance:** Periodically remove the stainless steel drain strainer and clean any accumulated hair or debris. This prevents clogs and ensures efficient drainage.
- **Inspect Seals:** Occasionally inspect the sealant around the edges of the shower base for any signs of wear, cracking, or mold. Reapply sealant as needed to maintain a watertight seal.

## 8. Troubleshooting

Here are some common issues and their potential solutions:

Problem	Possible Cause	Solution
Slow Drainage	Clogged drain strainer or pipe.	Remove and clean the drain strainer. If the problem persists, a plumber may be needed to clear the pipe.
Water Leaks Around Base	Improperly sealed edges or loose drain connection.	Inspect and reapply sealant around the base edges. Check and tighten drain connections.
Base Feels Unstable	Uneven subfloor or improperly adjusted feet.	Re-level the shower base using the adjustable feet. Ensure the subfloor is adequately prepared.

## 9. Specifications

Attribute	Detail
Brand	Garvee
Model Number	B0FXGP44LN
Dimensions (L x W)	60 inches x 32 inches
Material	Heavy-duty Resin, Stainless Steel (drain)
Finish Type	Glossy
Color	White
Drain Type	Center Drain with Stainless Steel Strainer
Item Weight	56.4 Pounds
Installation Type	Screw-In (for adjustable feet)
Required Assembly	No (minor assembly for drain connection)

## 10. Warranty and Support

---

For warranty information or technical support, please refer to the contact details provided at the point of purchase or visit the official Garvee website. Keep your purchase receipt as proof of purchase for any warranty claims.
