TROUBLESHOOTING GUIDE

This section addresses common issues you might encounter with your loft bed.

Assembly Issues

- **Missing Parts:** If any parts are missing, refer to the parts list in your assembly guide and contact customer support for replacements.
- **Difficulty Aligning Holes:** Ensure all parts are correctly oriented as per the assembly instructions. Sometimes, loosening adjacent bolts slightly can help with alignment before re-tightening.
- **Wobbling:** Ensure all bolts and fasteners are fully tightened. Uneven flooring can also cause wobbling; consider using furniture pads or shims to level the bed.

LED Lights Not Working

- **Power Connection:** Verify the LED strip is securely plugged into a working power outlet.
- **App/Remote:** Ensure the app is correctly paired or the remote control has working batteries and is within range.
- **Damage:** Inspect the LED strip for any visible damage. If damaged, contact customer support.

Charging Station Not Functioning

- **Power Connection:** Confirm the bed's main power cord is securely plugged into a functional wall outlet.
- **Device Compatibility:** Ensure your device is compatible with the USB or Type-C port (e.g., correct cable, device not requiring higher wattage than provided).
- **Overload:** Avoid plugging in too many high-power devices simultaneously, which could trip a circuit.
