TRIXIE Brunna XXL Cat Tree (Model 48158) Instruction Manual

Your guide to assembling, using, and maintaining your TRIXIE Brunna XXL Cat Tree.

INTRODUCTION

The TRIXIE Brunna XXL Cat Tree, Model 48158, is designed to provide a comprehensive activity and resting space for large and heavy cats. This robust cat tree features multiple levels, durable sisal scratching posts, a comfortable cave, and a soft hammock, offering various opportunities for play, climbing, scratching, and relaxation. This manual provides essential information for the safe and correct assembly, use, and maintenance of your cat tree.

SETUP INSTRUCTIONS

Careful assembly is crucial for the stability and safety of the TRIXIE Brunna XXL Cat Tree. Please follow these general steps. Refer to the detailed assembly diagrams included in your product packaging for specific part identification and sequence.

1. **Unpack All Components:** Carefully remove all parts from the packaging. Verify that all components listed in the parts list (usually found in the included assembly guide) are present and undamaged.
2. **Identify Parts:** Familiarize yourself with the different platforms, scratching posts, connectors, and hardware.
3. **Assemble the Base:** Begin by attaching the lowest scratching posts to the base platform using the provided screws and tools. Ensure these connections are secure.
4. **Build Upwards:** Continue assembling the structure layer by layer, attaching platforms, caves, and additional scratching posts as indicated in the assembly diagrams. Pay close attention to the orientation of each piece.
5. **Secure All Connections:** Once fully assembled, double-check all screws and connections to ensure they are tightened securely. A stable cat tree is essential for your cat's safety.
6. **Placement:** Place the cat tree on a flat, stable surface. Consider placing it near a window or in a common area where your cat enjoys spending time.

USAGE GUIDELINES

The TRIXIE Brunna XXL Cat Tree offers various features for your cat's well-being. Encourage your cat to explore and utilize all parts of the tree.

- **Scratching Posts:** The sisal-covered posts provide an ideal surface for your cat to sharpen its claws, helping to protect your furniture.
- **Platforms:** Multiple platforms at different heights allow your cat to climb, observe its surroundings, and rest.
- **Comfortable Cave:** The enclosed cave offers a secure and cozy retreat for your cat to sleep or hide.
- **Hammock:** The soft hammock provides an additional comfortable spot for relaxation.
- **Encouragement:** If your cat is hesitant to use the tree, try placing treats, toys, or catnip on different levels to encourage exploration.

MAINTENANCE

Regular maintenance ensures the longevity and hygiene of your cat tree.

- **Regular Cleaning:** Vacuum the plush surfaces regularly to remove cat hair and dust. For minor stains, use a damp cloth with a mild, pet-safe cleaning solution. Avoid harsh chemicals.
- **Sisal Post Care:** The sisal scratching posts are designed to withstand scratching. Periodically check them for excessive wear.
- **Check Stability:** Periodically inspect all screws and connections to ensure they remain tight. Re-tighten any loose parts to maintain the tree's stability.
- **Damage Inspection:** Regularly check for any signs of damage, such as frayed sisal, torn fabric, or broken components. Replace damaged parts if necessary to ensure your cat's safety.

TROUBLESHOOTING

Here are solutions to common issues you might encounter:

- **Instability:** If the cat tree feels wobbly, ensure it is placed on a flat, level surface. Re-check and tighten all assembly screws.

- **Cat Not Using the Tree:** Cats can be particular. Try placing the tree in a different location, especially near a window or a favorite resting spot. Use catnip spray on the scratching posts or platforms to attract your cat. Place favorite toys or treats on the tree.
- **Loose Components:** If a platform or post becomes loose, immediately re-tighten the corresponding screws. Do not allow your cat to use the tree if it is unstable.

SPECIFICATIONS
