Aivituvin AIR7017-N

Aivituvin Catio Outdoor Cat Enclosure Window Instruction Manual

Introduction

This manual provides comprehensive instructions for the assembly, operation, and maintenance of your Aivituvin Catio Outdoor Cat Enclosure Window, Model AIR7017-N. This spacious, multi-level catio is designed to offer a safe and stimulating outdoor environment for multiple cats, featuring various interactive elements.

Safety Information

- Read all instructions thoroughly before beginning assembly and prior to any use of the enclosure.
- Ensure all parts are correctly assembled and securely fastened before allowing cats to enter the enclosure.
- Regularly inspect the catio for any signs of damage, wear, or loose components. Address any issues immediately to maintain structural integrity and safety.
- Position the catio on a stable, level surface to prevent tipping or instability.
- Supervise pets, especially during their initial introduction to the catio, to ensure they adapt safely to the new environment.

Package Contents

Before starting assembly, verify that all components listed below are present and undamaged. The package includes:

- 6 Platforms: Multiple shelves for climbing and resting.
- 2 Hideout Houses (Cat Condos): Enclosed spaces for privacy and sleep.
- 2 Scratching Posts: Sisal-wrapped posts for claw maintenance.
- 2 Hammocks (Baskets): Soft, elevated resting spots.
- 1 Wall-Mounted Bridge: Connects different levels for exploration.
- All necessary wooden panels, wire mesh sections, and assembly hardware.

Setup and Assembly

The estimated assembly time for this catio is approximately 45 minutes with two people. A standard screwdriver is required, and a power drill is recommended for increased efficiency.

1. **Unpack and Organize:** Carefully unpack all components. Identify each part using the labels provided on the wood. It is highly recommended to organize all pieces by their labels before beginning assembly.
2. **Assemble Frame:** Follow the numbered instructions to assemble the main frame panels of the catio. Ensure that all connections are aligned correctly.
3. **Attach Components:** Securely attach the platforms, hideout houses, scratching posts, hammocks, and the bridge to the designated locations within the catio structure.
4. **Secure Fasteners:** Tighten all screws securely. Exercise caution to avoid over-tightening, which can cause the wood to split.
5. **Window Connection:** The catio is designed to connect to a window. A section of the wire mesh can be removed to create an opening, allowing your cats free indoor-outdoor access.
6. **Flexible Installation:** The internal shelves and bridge can be attached directly to the catio structure or mounted to an adjacent wall, offering flexibility in setup.

Two Assemble Way For For Different Fun

Attach cat shelves bridge to wall or product

Operating Instructions

- **Indoor-Outdoor Access:** Utilize the designated opening to connect the catio to your home via a window or pet door. This allows your cats to freely transition between indoor and outdoor environments.
- **Access Door:** The full-height front door (64 inches high) provides convenient human access for interacting with your cats, placing food/water, or performing cleaning tasks without needing to bend down.
- **Multi-Level Play:** Encourage your cats to explore the various platforms, bridge, and scratching posts. These features promote exercise and mental stimulation.

Maintenance

- **Weather Protection:** The catio is equipped with a waterproof roof cover designed to protect your cats and the structure from rain and harmful UV rays. Ensure the roof cover is properly installed and secured.
- **Cleaning:** Regularly clean the platforms, hammocks, and all interior surfaces of the catio. The walk-in design provides easy access for thorough cleaning. Use pet-safe cleaning solutions.
- **Inspection:** Periodically check all wooden components and wire mesh for any signs of wear, damage, or loose connections. Promptly address any issues to maintain the structural integrity and safety of the enclosure.

Troubleshooting

- **Wood Splitting:** During assembly, tighten screws slowly and carefully to prevent the fir wood from splitting. If minor splitting occurs, wood glue can be applied to reinforce the area.
- **Panel Alignment:** If panels do not align perfectly during assembly, particularly for the roof, slight adjustments to the frame or gentle manipulation may be required. Ensure the base is level before proceeding.
- **Durability Concerns:** The catio is constructed from fir wood. For enhanced longevity and resistance to harsh weather conditions, consider applying an additional weather-resistant sealant or paint.
- **Missing Parts:** If you discover any missing components upon unpacking, please contact Aivituvin customer support immediately for assistance.

Specifications

Model Number	AIR7017-N
Product Dimensions (L x W x H)	104.33" x 33.86" x 69.49"
Material	Fir Wood
Color	Grey
Included Components	6 Platforms, 2 Hideout Houses, 2 Scratching Posts, 2 Hammocks, 1 Bridge
Manufacturer	Aivituvin
