OPERATING INSTRUCTIONS

Hydraulic Storage Mechanism

The bed features a hydraulic lift mechanism for convenient access to under-bed storage. To open:

1. Remove any heavy items from the mattress surface.
2. Grasp the handle or edge of the bed frame at the footboard.
3. Gently lift the frame upwards. The hydraulic pistons will assist in lifting and holding the mattress and frame in an open position.
4. To close, gently push the frame downwards until it locks into place. Ensure hands and objects are clear of the closing mechanism.

- **Dusting:** Regularly dust the headboard and frame with a soft, dry cloth.
- **Hydraulic Mechanism:** Periodically check the hydraulic pistons for smooth operation. Do not apply

oil or lubricants unless specifically instructed by the manufacturer.

- **Frame Integrity:** Periodically check all bolts and screws to ensure they remain tight. Re-tighten if necessary.
