6. Maintenance

Fabric Care:

- Regularly vacuum the velvet fabric using a soft brush attachment to remove dust and debris.
- For spills, blot immediately with a clean, dry cloth. Do not rub.
- For stubborn stains, consult a professional upholstery cleaner or use a mild fabric cleaner specifically designed for velvet, testing on an inconspicuous area first.
- Avoid direct sunlight to prevent fading of the fabric.

Frame Care:

- Periodically check all bolts and connections to ensure they remain tight. Retighten as necessary to maintain stability.
- Wipe down wooden and metal parts with a damp cloth as needed. Avoid harsh chemicals.
- Ensure the area under the bed is clear to allow drawers to slide freely.

7. Troubleshooting

Common Issues and Solutions:

- **Bed Frame Wobbles:**
Solution: Check all bolts and connections, especially those securing the side rails and center support bar. Ensure they are fully tightened. Verify that the bed is on a level surface.
- **Drawers Do Not Slide Smoothly:**
Solution: Ensure the casters on the drawers are clean and free of debris. Check that the drawers are properly aligned within their designated space under the bed. Verify that the casters are securely attached to the drawer base.
- **Gaps Around Mattress:**
Solution: Ensure you are using a Queen size mattress (60" x 80"). Small variations in mattress size can occur. If gaps are significant, consider adding a mattress topper or padding to fill the space.
- **Noise from Slats:**
Solution: Ensure all slats are correctly seated in their holders and are not damaged. The upgraded slat system is designed to be noise-free, so check for any loose connections or foreign objects between the slats and the frame.
