Vayepro HP202-T5G Infrared Double Burner Electric Cooktop Instruction Manual

Model: **HP202-T5G** | Brand: **Vayepro**

1. INTRODUCTION

Thank you for choosing the Vayepro HP202-T5G Infrared Double Burner Electric Cooktop. This portable and efficient appliance is designed to provide a versatile cooking solution for various environments, including homes, dorms, offices, campsites, and RVs. Featuring two powerful infrared burners and a durable ceramic glass surface, it offers quick heating and compatibility with all types of cookware. Please read this manual thoroughly before use to ensure safe and optimal operation.

2. SAFETY INSTRUCTIONS

To prevent injury or damage, always follow these basic safety precautions:

- **Electrical Safety:** Ensure the cooktop is plugged into a grounded 120V/1800W power outlet. Do not use with damaged cords or plugs.
- **Hot Surface Warning:** The burner surface becomes extremely hot during and after use. **Do not touch the burner body when in use or immediately after turning off.** Allow sufficient time for cooling. The red indicator light will remain on until the surface is cool enough to touch.
- **Overheating Protection:** The cooktop is equipped with a thermal fuse for overheating protection, automatically cycling on and off to maintain the desired temperature.
- **Cookware Placement:** Do not place wet cookware on the heating elements to avoid rust or damage.
- **Ventilation:** Ensure adequate ventilation around the cooktop during operation.
- **Flameless Operation:** This infrared cooktop operates without an open flame, producing no carbon monoxide and no electromagnetic radiation, making it safe for indoor use.
- **Boiling Water:** When boiling water, always cover your cookware with a lid to improve efficiency and

prevent excessive steam.

- **Children and Pets:** Keep the appliance out of reach of children and pets.

3. PRODUCT OVERVIEW

The Vayepro HP202-T5G features a sleek, compact design with two independent infrared burners, each controlled by its own knob. The ceramic glass surface ensures durability and high heat efficiency.

Components:

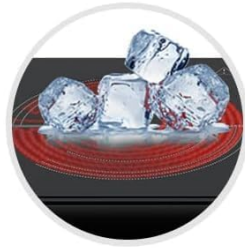

- **Dual Infrared Burners:** Two heating zones for simultaneous cooking.
- **Ceramic Glass Surface:** Durable, heat-resistant, and easy to clean.
- **Control Knobs:** Independent controls for each burner, offering 5 heating levels (OFF, MIN, 1-5, MAX).
- **Indicator Lights:** Red lights illuminate when a burner is active and remain on until the surface has cooled.
- **Power Cord:** For connecting to a standard electrical outlet.

4. SETUP

Setting up your Vayepro Electric Cooktop is straightforward:

1. **Unpack:** Carefully remove the cooktop from its packaging. Retain packaging for future storage or transport.
2. **Placement:** Place the cooktop on a stable, flat, heat-resistant surface. Ensure there is adequate clearance around the appliance for ventilation.
3. **Power Connection:** Plug the power cord into a standard 120V/1800W electrical outlet. The cord length is approximately 3 feet.
4. **Initial Burn-off:** Before first use, turn both burners to the MAX setting for approximately 15 minutes without cookware. This will burn off any manufacturing residues. A slight odor or smoke is normal during this process. Ensure the area is well-ventilated.

5. OPERATING INSTRUCTIONS

Operating your Vayepro cooktop is simple and intuitive:

1. **Turn On:** Rotate the desired burner's control knob from the 'OFF' position to any of the numbered settings (1-5) or 'MAX'. The corresponding red indicator light will illuminate.
2. **Adjust Heat:** Select the desired heating level by rotating the knob. Settings range from 'MIN' (low heat) to 'MAX' (high heat), with intermediate settings 1 through 5.
3. **Fast Heating:** The vertical heating technology allows the core to heat up in just a few seconds, distributing heat evenly and efficiently through infrared radiation.
4. **Automatic Temperature Control:** The burner cycles on and off automatically to maintain the set temperature. The heating indicator light will turn off when the set temperature is reached and turn back on if the temperature drops below the set point.
5. **Turn Off:** After cooking, rotate the control knob back to the 'OFF' position. The red indicator light will remain on until the burner surface has cooled down to a safe temperature.

6. COMPATIBLE COOKWARE

Unlike induction cooktops that require specific magnetic cookware, the Vayepro Infrared Double Burner Electric Cooktop is compatible with **all types of flat-bottomed cookware**. This includes, but is not limited to:

- Aluminum pots and pans
- Stainless steel pots and pans
- Ceramic cookware
- Glass cookware
- Cast iron pots and pans
- Frying pans, woks, and stovetop teapots

The burners can accommodate cookware as large as 7.1 inches in diameter and as heavy as 22 lbs.

Compatible with all cookware

7. CLEANING AND MAINTENANCE

Proper cleaning and maintenance will extend the life of your cooktop:

- **Always unplug the appliance** and allow it to cool completely before cleaning. The red indicator light will turn off when the surface is cool.
- **Surface Cleaning:** The ceramic glass surface can be easily cleaned by wiping with a clean, damp cloth. For stubborn stains, use a mild non-abrasive cleaner specifically designed for ceramic cooktops.
- **Base Cleaning:** Wipe the exterior base with a damp cloth. Do not immerse the cooktop in water or any other liquid.
- **Avoid Abrasives:** Do not use abrasive cleaners, scouring pads, or sharp objects that could scratch or damage the surface.
- **Storage:** Store the cooktop in a dry place when not in use.

8. TROUBLESHOOTING

If you encounter any issues with your Vayepro HP202-T5G cooktop, please refer to the following common solutions:

- **Cooktop not turning on:** Ensure the power cord is securely plugged into a functional electrical outlet. Check if the control knob is turned to an 'ON' position (MIN, 1-5, or MAX).
- **Burner not heating:** Verify that the control knob for the specific burner is set to an active heating level. Allow a few seconds for the infrared element to glow red.
- **Indicator light not turning off:** This is normal. The indicator light remains on until the burner surface has cooled down to a safe temperature, even after the knob is turned to 'OFF'.
- **Unusual odor or smoke during first use:** This is normal during the initial burn-off period as manufacturing residues are eliminated. Ensure good ventilation.

If problems persist, please contact Vayepro customer support for assistance.

9. SPECIFICATIONS

Feature	Specification
Brand	Vayepro
Model Number	HP202-T5G
Color	Black
Material	Ceramic Glass
Special Feature	Electric
Heating Elements	2
