SAFETY INFORMATION

The WayLite 25W Wireless Charger is equipped with multiple protection mechanisms to ensure safe and reliable charging:

- **Over-Current Protection:** Prevents damage from excessive current.

- **Over-Voltage Protection:** Safeguards against voltage spikes.
- **Over-Temperature Protection:** Automatically regulates temperature to prevent overheating.
- **Short-Circuit Protection:** Protects against electrical shorts.

To maintain optimal safety and performance:

- Avoid placing metal objects or foreign materials between your device and the charging pad.
- Do not use non-magnetic phone cases or cases with ring stands, as these can interfere with magnetic alignment and charging efficiency, potentially leading to overheating.
- Ensure adequate ventilation around the charging pad during use.

TROUBLESHOOTING

- **Device not charging:** Ensure the charging pad is securely connected to a functional power adapter and wall outlet. Verify that your device is Qi2-enabled and correctly centered on the charging pad. Remove any non-magnetic or excessively thick phone cases.
- **Slow charging:** Confirm you are using a 30W or higher power adapter for optimal fast charging. Ensure there are no foreign objects between your device and the charging pad.
- **Charger or device overheating:** While the charger has built-in over-temperature protection, ensure proper ventilation. Remove any non-magnetic cases that might trap heat. If overheating persists, discontinue use and contact support.
