2. SETUP AND INITIAL PREPARATION

Upon receiving your Vireon Sweet Spot Pillow, please follow these steps for initial setup:

1. **Unpacking:** Carefully remove the pillow from its packaging. Due to compression during shipping, the pillow may appear temporarily dented or flattened.
2. **Shape Recovery:** Allow the pillow to rest for approximately two days in a well-ventilated area. The high-density memory foam will naturally expand and recover its intended shape.
3. **Pillowcase Preparation:** The pillow comes with a breathable, skin-friendly, and removable cotton-polyester fabric pillowcase. It is recommended to wash the pillowcase before its first use.

5. TROUBLESHOOTING

If you encounter any issues with your Vireon Sweet Spot Pillow, please refer to the following common solutions:

- **Pillow Appears Dented or Flat:** If the pillow does not immediately appear to be its full size or shape upon unpacking, this is normal due to packaging compression. Allow up to two days for the high-density memory foam to fully expand and recover its original form.
- **Lack of Expected Support:** Ensure the pillow is positioned correctly according to your desired posture. The ergonomic design is intended to align with body contours. If the issue persists, verify that the pillow has fully expanded after unpacking.
- **Unusual Odor:** A new memory foam product may have a slight odor upon unpacking. This is harmless and will dissipate within a few days in a well-ventilated area.
