5. MAINTENANCE

Regular maintenance will help prolong the life and ensure the continued stability of your bed frame.

- **Cleaning:** Wipe the metal frame with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners that could damage the finish.
- **Tighten Connections:** Periodically (e.g., every 3-6 months) check all bolts and connections. Re-tighten any loose fasteners to maintain stability and prevent noise.
- **Inspect for Damage:** Regularly inspect the frame for any signs of wear, bending, or damage. If any damage is found, discontinue use and contact customer support.

6. TROUBLESHOOTING

If you encounter any issues with your LEVELEVE Full Bed Frame, refer to the following common solutions:

- **Squeaking or Rattling:** This is often caused by loose connections. Re-tighten all bolts and ensure the steel slats are properly seated. The frame features a noise-reduction system, so persistent noise may indicate a loose part.

- **Instability/Wobbling:** Ensure all legs are firmly on the ground and all bolts are securely tightened. Check that the frame is assembled correctly according to the instructions.
- **Difficulty Assembling:** Double-check the instruction manual and ensure all parts are correctly oriented. Do not force parts together. If a part seems ill-fitting, verify it is the correct part for that step.
- **Missing Parts:** If any parts are missing upon unboxing, do not proceed with assembly. Contact customer support immediately for replacement parts.
