## 8. MAINTENANCE

- Clean the power bank with a soft, dry cloth. Do not use harsh chemicals or abrasive materials.
- Store the power bank in a cool, dry place away from direct sunlight.
- Charge the power bank at least once every three months to maintain battery health.

## 9. TROUBLESHOOTING

- **Device not charging:** Ensure the power bank is charged. Check cable connections for wired charging. For wireless charging, ensure

proper alignment and MagSafe compatibility.

- **Slow charging:** Verify that your device supports fast charging and that you are using a compatible cable and adapter.
- **Power bank overheating:** Disconnect the device and allow the power bank to cool down. Ensure it is not covered or in a poorly ventilated area. Charging may stop at 80% to protect the battery if the device gets too warm.

## Charging Stops at 80%?

Your iPhone may stop charging at 80% to protect the battery. This can happen if it gets too warm during charging as part of iOS 17's thermal control strategy. Charging will resume once the device cools down. Moving your iPhone to a cooler area may help.
