ACCOHOHO LM108-SERIES

ACCOHOHO Queen Bed Frame with Headboard, LED Light, and Storage Drawers User Manual

Model: LM108-SERIES

INTRODUCTION

This manual provides detailed instructions for the assembly, operation, maintenance, and troubleshooting of your ACCOHOHO Queen Bed Frame. Please read this manual thoroughly before beginning assembly or use to ensure proper function and safety.

The ACCOHOHO Queen Bed Frame features a 52-inch tall headboard with integrated storage, LED lighting, a charging station, and four under-bed storage drawers. It is designed for use with a Queen-sized mattress and does not require a box spring.

IMPORTANT SAFETY INFORMATION

- **Maximum Load Capacity:** Do not load the bed frame with more than 800 pounds. Exceeding this weight limit may cause damage to the frame and potential injury.
- **Headboard Edges:** Exercise caution around the headboard, as some edges may be sharp.
- **Assembly:** Assembly requires careful attention to instructions. Ensure all components are securely fastened before use.
- **Electrical Components:** When using the charging station and LED lights, ensure all connections are secure and follow standard electrical safety practices. Do not expose electrical components to moisture.
- **Children and Pets:** Keep small children and pets away from small parts during assembly. Ensure under-bed storage areas are secured if small animals are present, as they may access the central bed area through open cubbies.

SETUP AND ASSEMBLY

Your ACCOHOHO Queen Bed Frame is delivered in two separate packages. These packages may not arrive on the same day. Please ensure you have received both packages before beginning assembly.

Preparation

- 1. Unpack and Sort:** Carefully unpack all components from both boxes. Lay out and sort all boards and hardware. This process requires a spacious area.
- 2. Inspect Components:** Before assembly, thoroughly inspect each piece for any damage or defects. If issues are found, contact customer support before proceeding.
- 3. Tools Required:** The necessary tools are typically included. However, having additional Allen wrenches, a wrench, and a screwdriver with a ratchet can facilitate the assembly process.

Assembly Steps

Follow the included picture-based instructions step-by-step. Do not attempt to skip steps or anticipate future connections. The assembly involves numerous screws, cam nuts, and other parts, requiring careful attention to detail.

- **Hardware:** The manufacturer provides extra hardware. Use the appropriate screws and fasteners for each

step. Be cautious not to overtighten screws, especially in engineered wood components, to prevent stripping.

- **Slats Installation:** When installing the bed slats, ensure the plastic pieces are correctly aligned and firmly pushed into the metal side rails. Avoid forcing them if they do not align, as this can warp or damage the connectors.
- **Assistance:** For larger components, a second pair of hands can be helpful.

- **Headboard Storage Cabinets:** The 52-inch tall headboard features two hinged barn door-style storage cabinets. These provide enclosed space for personal items, reducing dust and enhancing privacy.
- **Under-Bed Storage Drawers:** The bed frame includes four hidden drawers, two on each side. These drawers offer additional storage for linens, out-of-season clothing, and other bedroom essentials. The drawers can be easily disassembled if needed.
- **Open Storage Cubbies:** The headboard also includes open storage cubbies for display items or frequently accessed objects.

MAINTENANCE

- **Cleaning:** Wipe down the bed frame surfaces with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners that could damage the finish.
- **Hardware Check:** Periodically inspect all screws and fasteners to ensure they remain tight. Retighten as necessary to maintain stability and prevent squeaking.

- **Weight Distribution:** Distribute weight evenly across the bed frame and avoid placing excessive weight on any single point.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Bed frame squeaks	Loose connections or uneven assembly.	Check all screws and bolts, and tighten them securely. Ensure the bed frame is on a level surface.
LED light strip not working	Loose connection, power issue, or damaged strip.	Verify the power adapter is securely plugged in. Check all connections to the LED strip. If the strip appears damaged, contact customer support.
Charging station not providing power	Power cable not connected, outlet issue.	Ensure the charging station's power cable is fully plugged into a functional wall outlet. Test the outlet with another device.
Slats are loose or damaged	Improper installation of plastic connectors, excessive force during assembly.	Re-examine slat connectors for proper seating. If connectors are warped or broken, contact customer support for replacements.
Damaged or yellowed components upon arrival	Shipping damage or manufacturing defect.	Do not proceed with assembly. Contact ACCOHOHO customer support immediately for assistance with replacement parts or returns.
