Assembly of the Bellemave Twin Size Loft Bed requires careful attention to detail. It is recommended that two adults assemble the bed to ensure safety and proper construction.

Before You Begin:

1. **Unpack All Components:** Carefully remove all parts from the packaging and lay them out on a clean, soft surface (like a carpet or blanket) to prevent scratches.
2. **Verify Parts:** Check the included parts list against the contents to ensure all pieces are present and undamaged. If any parts are missing or damaged, do not proceed with assembly. Contact customer support immediately.
3. **Gather Tools:** Ensure you have all necessary tools as specified in the assembly instructions (usually an Allen wrench, which is often included, and a screwdriver).

Assembly Steps (General Guidance):

While specific step-by-step instructions are provided in the physical manual included with your product, here is a general sequence:

1. Assemble the main frame components, including the side rails and end panels.
2. Attach the playhouse panels, including the door and window sections.

MAINTENANCE

Regular maintenance will help preserve the condition and safety of your Bellemave Loft Bed.

- **Cleaning:** Wipe surfaces with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners that could damage the finish.
- **Hardware Check:** Periodically (e.g., every 3-6 months) inspect all bolts, screws, and connectors to ensure they are tight. Retighten as necessary, but do not overtighten.
- **Structural Integrity:** Check for any signs of wear, cracks, or damage to the wood components. If damage is found, discontinue use and contact customer support for replacement parts or advice.
- **Ladder Safety:** Ensure the ladder remains securely attached and its steps are free from obstructions.

TROUBLESHOOTING

This section addresses common issues you might encounter with your loft bed.

Issue: Bed feels wobbly or unstable.

- **Solution:** Check all assembly hardware (bolts, screws) and tighten them securely. Ensure the bed is placed on a level surface.

Issue: Squeaking noises.

- **Solution:** Squeaking often indicates loose connections. Retighten all bolts and screws. Applying a small amount of wax or lubricant to the joints where wood meets wood can also help.

Issue: Ladder feels loose.

- **Solution:** Ensure the ladder attachment bolts are fully tightened. If the ladder is damaged, do not use the upper bunk and contact customer support.
