OPERATING INSTRUCTIONS

Trundle Bed Operation:

The trundle bed is located beneath the main bed frame. To use, gently pull the trundle frame outwards from the main bed. It is equipped with wheels for smooth movement. To store, push the trundle back into its position under the main bed until it is fully recessed.

Storage Drawers:

The three spacious drawers are designed for storing bedding, linens, or other personal items. Pull the knobs to open the drawers and push them firmly to close. Ensure no items obstruct the drawer's path.

Storage Shelves:

The integrated shelves in the headboard provide convenient open storage for books, decor, or small essentials. Arrange items to prevent them from falling.

Charging Station:

The charging station includes one Type-C port and one USB port. Connect the charging station's power cord to a standard wall outlet. You can then plug in your electronic devices for convenient charging directly from your bed.

LED Light:

The LED light strip around the headboard provides ambient lighting. Connect the LED light's power adapter to a wall outlet. Operate the light using the integrated switch, typically located near the charging station.

Multifunctional Desk and Cabinet:

The integrated desk can be used for work, study, or as an additional surface. The cabinet provides enclosed storage. Open the cabinet door to access the storage space inside.

MAINTENANCE

- **Cleaning:** Wipe the surfaces with a dry cloth. Avoid using harsh chemicals or abrasive cleaners, which can damage the finish.

- **Hardware Check:** Periodically inspect all bolts, screws, and connections. Tighten any loose hardware to ensure stability and safety.
- **Electrical Components:** Keep the charging station and LED light free from dust. Do not attempt to repair electrical components yourself; contact qualified personnel if issues arise.
- **Avoid Overloading:** Do not overload the storage shelves or drawers beyond their reasonable capacity.

TROUBLESHOOTING

Loose or Wobbly Frame:

Check all assembly bolts and screws. Tighten any that are loose. Ensure the bed is placed on a level surface.

Trundle Bed Not Sliding Smoothly:

Inspect the wheels for any obstructions or damage. Ensure the track beneath the main bed is clear. Lubricate wheels if necessary.

Charging Station Not Working:

Verify that the charging station's power cord is securely plugged into a functional wall outlet. Check for any visible damage to the cord or ports. Test with a different device.

LED Light Not Illuminating:

Ensure the LED light's power adapter is correctly plugged into both the light strip and a working wall outlet. Check the switch for proper operation. Inspect the light strip for any visible damage.
