TELESIN Master Grip Kit 17 Pro Creator Combo

TELESIN Master Grip Kit for iPhone 17 Pro User Manual

Model: Master Grip Kit 17 Pro Creator Combo

1. Product Overview

The TELESIN Master Grip Kit for iPhone 17 Pro is designed to enhance mobile photography by providing a magnetic phone camera grip, C03 selfie light, UV and CPL filters, wireless charging capabilities, and a cooling graphene case. This kit offers DSLR-like stability and control for extended shooting sessions.

Key Features:

- **Wireless Charging Grip:** Features a built-in 3200mAh battery for fast wireless charging, extending shooting time. It can power your phone and another device simultaneously via a cable.
- **Telesin ReefColor App Integration:** Allows for continuous OTA firmware updates and integrates eight master-level filters. The app provides professional parameter adjustments to optimize camera performance.
- **Ergonomic Design:** The Magsafe phone camera grip offers DSLR-like balance and stability. Its compact, ergonomic finger-hook design improves handling and portability.
- **Expandable Accessories:** Compatible with the TELESIN C03 magnetic selfie light series and features a 1/4” tripod screw connector for attaching tripods, microphones, and other accessories.
- **Pro-Photography Excellence (CPL Filter):** The included CPL filter reduces reflections and glare, enhancing color saturation in photos.

3. Setup Guide

3.1 Installing the ReefColor App

1. Search for and download the 'ReefColor' app from your device's app store.
2. Allow all necessary permissions (e.g., camera, microphone, photo library, wireless data) when prompted by the app.
3. Review the in-app novice guide for an introduction to the app's features.

3.2 Connecting the Master Grip Controller

1. Turn on the Master Grip Controller. The indicator light will flash green.
2. In the ReefColor app, click the '+' sign in the upper left corner of the screen to add a new device.
3. Select 'Master Grip' from the available devices and pair it with your iPhone via Bluetooth.

3.3 Attaching Filters and Selfie Light

- Slide the UV or CPL filter onto the magnetic rail of the graphene case, ensuring it aligns with the iPhone's camera lenses.

- Attach the C03 Selfie Light to the designated magnetic mount on the grip or case.

4. Operating Instructions

4.1 Basic Controls

- **Shooting Button:** Half-press to focus and lock exposure; full-press to capture a photo or start/stop video recording.
- **Zoom Rocker:** Use to zoom in or out.

- **Mode Dial:** Default function is to switch between shooting modes. Can be customized via the app.
- **Screen Off Wake Button:** Press for 2 seconds to wake the camera or switch between front/rear cameras.
- **Fn Custom Key:** In the app, press to switch dial mode. In video mode, press to capture, double-click to start/stop.

4.2 ReefColor App Functions

- **Customizing Buttons:** Access the device page in the app to customize the functions of the Dial, Fn Key, and Wake-Up Key.
- **Filters:** Explore and apply various master-level filters (e.g., FNC, Hass X, FSA, Leica M, Polaroid, CCD, EOS, Faded) to enhance your photos and videos.
- **Firmware Updates:** The app supports continuous OTA firmware updates for the Master Grip.

5. Maintenance

To ensure the longevity and optimal performance of your TELESIN Master Grip Kit, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to wipe the grip, case, and filters. For stubborn smudges on filters, use a lens cleaning solution and a microfiber cloth. Avoid abrasive materials.
- **Storage:** Store the kit in a cool, dry place away from direct sunlight and extreme temperatures. Use the provided packaging or a protective case when not in use.
- **Battery Care:** For the wireless charging grip, avoid fully discharging the battery frequently. Charge it regularly, even if not in use, to maintain battery health.
- **Filter Handling:** Handle filters by their edges to avoid fingerprints and scratches on the glass surface.

6. Troubleshooting

If you encounter issues with your TELESIN Master Grip Kit, refer to the following common troubleshooting steps:

- **Device Not Connecting:** Ensure the Master Grip Controller is powered on and fully charged. Verify Bluetooth is enabled on your iPhone and try re-pairing the device through the ReefColor app.
- **App Functionality Issues:** Check if the ReefColor app has all necessary permissions enabled in your iPhone's settings. Ensure the app is updated to the latest version. Restarting the app or your iPhone may resolve minor glitches.
- **Wireless Charging Not Working:** Confirm that the grip's battery is charged. Ensure your iPhone is correctly aligned with the magnetic charging area on the grip.
- **Filter Performance:** If filters appear to have reduced clarity or unexpected effects, ensure they are clean and correctly seated on the graphene case.
- **Firmware Update Failure:** Ensure your iPhone has a stable internet connection during firmware updates. Do not interrupt the update process. If an update fails, try again or contact support.
