Todikaper Redkey P8 Filter

Todikaper Washable Filter for Redkey P8 Cordless Vacuum - Instruction Manual

INTRODUCTION

This manual provides instructions for the proper installation, operation, and maintenance of your Todikaper Washable Filter, designed specifically for the Redkey P8 Cordless Vacuum. Regular filter maintenance ensures optimal performance and extends the life of your vacuum cleaner.

SAFETY INFORMATION

Always ensure the vacuum cleaner is turned off and unplugged before attempting to remove or install the filter. Do not operate the vacuum without a filter installed. Ensure the filter is completely dry before reinstallation to prevent damage to the vacuum motor.

PACKAGE CONTENTS

Your package includes:

- 2 or 4 x Todikaper Washable Filters (depending on package purchased)

Image: Two sets of Todikaper washable filters, showing the pleated filter within an orange frame and a separate black foam filter for each set.

SETUP AND INSTALLATION

The Todikaper Washable Filter is designed for direct replacement in your Redkey P8 Cordless Vacuum. Follow these steps for installation:

1. **Power Off:** Ensure your Redkey P8 Cordless Vacuum is turned off and unplugged from its charging source.
2. **Locate Filter Compartment:** Refer to your Redkey P8 vacuum's user manual to locate the filter compartment. This is typically found near the dustbin.
3. **Remove Old Filter:** Carefully open the filter compartment and remove the existing filter. Dispose of the old filter responsibly if it is no longer usable.
4. **Insert New Filter:** Place the new Todikaper Washable Filter into the compartment. Ensure it is seated correctly and securely. The filter consists of two parts: a pleated filter within an orange frame and a circular black foam filter. Both must be installed correctly.
5. **Close Compartment:** Close the filter compartment securely.

Image: The two main components of the filter: the pleated filter housed in an orange plastic frame and the separate black foam filter.

OPERATING THE FILTER

Once installed, the Todikaper Washable Filter works passively to capture fine dust particles and allergens from the air as your Redkey P8 Cordless Vacuum operates. This helps maintain clean and fresh air in your home. The filter's effectiveness relies on regular cleaning and proper installation.

MAINTENANCE AND CLEANING

Regular cleaning of your washable filter is crucial for maintaining the vacuum's suction power and air filtration efficiency. It is recommended to clean the filter every 2-4 weeks, or more frequently with heavy use.

1. **Remove Filter:** Turn off and unplug the vacuum. Open the filter compartment and carefully remove both the pleated filter and the foam filter.
2. **Tap Out Debris:** Gently tap the filters over a trash can to remove loose dust and debris.
3. **Rinse:** Rinse both filters under cool, running water until the water runs clear. Do not use hot water or detergents, as this can damage the filter material.
4. **Dry Completely:** Allow both filters to air dry completely for at least 24 hours before reinstallation. Do not use a dryer or any heat source, as this can deform the filter. Ensure they are absolutely dry to prevent mold growth and motor damage.
5. **Reinstall:** Once completely dry, reinsert the foam filter, then the pleated filter into the vacuum's filter compartment, ensuring they are properly seated.

Note: Replace filters every 3-6 months, or sooner if you notice a significant decrease in vacuum performance or if the filters appear damaged.

2/4 PACK

TROUBLESHOOTING

If you experience issues with your Redkey P8 Cordless Vacuum's performance after installing or cleaning the filter, consider the following:

- **Reduced Suction Power:**

- Check if the filter is clogged. Clean the filter as per the "Maintenance and Cleaning" section.
- Ensure the filter is completely dry before reinstallation. A damp filter can restrict airflow.
- Verify the filter is correctly installed and seated securely in its compartment.
- If the filter is old or damaged, replace it with a new Todikaper Washable Filter.

- **Unusual Odors:**

- This may indicate the filter needs cleaning or replacement. Follow the cleaning instructions.
- Ensure the filter is thoroughly dried after washing to prevent mildew or bacterial growth.

SPECIFICATIONS

Product Name	Todikaper Washable Filter for Redkey P8 Cordless Vacuum
Brand	Todikaper
Compatibility	Redkey P8 Cordless Vacuum Cleaner
Material	High-quality materials, designed for durability and long service life.
Type	Washable Filter (Pleated and Foam components)
Package Quantity	2 or 4 filters (depending on variant)
