## SETUP

Upon arrival, your rug may have creases from packaging. Follow these steps to flatten it for optimal appearance and safety.

1. **Unroll and Reverse Roll:** Roll the rug in the opposite direction of the creases.
2. **Apply Weight:** Place heavy objects evenly across the rug for a few hours or overnight.
3. **Gentle Heat (Optional):** For stubborn creases, you may gently iron the rug on a low heat setting, placing a thin cloth between the iron and the rug surface.
4. **Allow Time:** Most fold marks will disappear naturally within a few days of placement and use.

## OPERATING (PLACEMENT & USE)

This rug is suitable for indoor use in various areas of your home. Its design ensures both comfort and practicality.

- **Versatile Placement:** Ideal for living rooms, bedrooms, dining rooms, foyers, and kids' rooms.
- **Non-Slip Safety:** The non-slip backing securely grips to hardwood, tile, or laminate floors, reducing the risk of accidental slips.
- **Low-Pile Design:** The low pile allows the rug to fit easily under furniture legs and beneath doorways without causing obstruction or tripping hazards.
- **Comfort for All:** The soft surface provides a comfortable area for bare feet, children playing, or pets resting.

## MAINTENANCE

The Garvee Floral Area Rug is designed for easy maintenance to keep it looking fresh and vibrant.

- **Machine Washing:** The entire rug is machine washable. Use a gentle cycle with cold water. Do not use bleach.
- **Drying:** Air dry flat to maintain its shape and vibrancy. Avoid tumble drying.
- **Spot Cleaning:** For small spills, blot immediately with a clean, damp cloth. Use a mild detergent if necessary, then blot dry.
- **Vacuuming:** Regular vacuuming helps maintain the rug's appearance. Use a robot vacuum or a regular vacuum with adjustable suction. Avoid high suction settings that may lift the rug.

## TROUBLESHOOTING

Here are solutions to common issues you might encounter with your rug.

- **Persistent Creases:** If creases do not disappear after initial setup, repeat the reverse rolling and weighting steps. Ensure the rug has enough time to settle.
- **Vacuuming Difficulty:** If your vacuum cleaner tends to suck up the rug, reduce the suction power or use a robot vacuum. The low-pile design is optimized for easy cleaning but may require adjusted vacuum settings.
- **Minimal Shedding:** This rug is designed to be non-shedding. Any minimal loose fibers observed initially are typically residual from the manufacturing process and will decrease with regular vacuuming and use.
