4. Charging the Device

The inflator has a built-in high-capacity rechargeable battery and can also be powered via a 12V DC car power cord.

4.1. Charging with Type-C Cable

- Connect the Type-C charging cable to the inflator's Type-C input port.
- Connect the other end of the cable to a compatible USB power adapter (not included) or a USB port.
- The battery indicator on the display will show charging status.

4.2. Charging with 12V DC Car Power Cord

- Plug the 12V DC car power cord into your vehicle's cigarette lighter socket.
- Connect the other end to the inflator's 12V DC input port.
- This method ensures continuous power supply, even if the internal battery is low.

5.2. Inflation Process

1. **Power On:** Press and hold the power button for 3 seconds to turn on the inflator. The digital display will light up.
2. **Select Mode:** Press the 'M' (Mode) button to cycle through the preset modes: Car, Motorcycle, Bicycle, Ball, and Custom. Each mode has a default pressure setting.
3. **Set Target Pressure:**
    - For preset modes, the default pressure is displayed. You can adjust it using the '+' and '-' buttons if needed.
    - In Custom mode, manually set your desired pressure using the '+' and '-' buttons.
4. **Start Inflation:** Short press the power button to begin inflation. The display will show the real-time pressure increasing.
5. **Auto Shut-off:** The inflator will automatically stop when the target pressure is reached.

6. **Disconnect:** Carefully disconnect the air hose from the item and then from the inflator.

The inflator offers dedicated preset modes for different types of tires and balls, simplifying the inflation process.
