5. ASSEMBLY INSTRUCTIONS

Assembly typically requires two people. Follow these steps carefully:

- Unpack and Identify Parts:** Lay out all components and hardware. Compare them with the parts list in your package to ensure everything is present.
- Assemble the Bed Frame:** Attach the headboard and footboard to the side rails using the provided hardware. Ensure all connections are snug but do not overtighten initially.
- Install Slats:** Position the reinforced plywood slats across the bed frame. Secure them to the side rails as indicated in the detailed instructions. Ensure the center support bar is correctly installed.
- Attach Stairs:** Secure the two-tier stairs to the designated side of the bed frame.
- Install Bookshelf:** Attach the bookshelf to the side of the bed frame.
- Assemble and Insert Storage Drawers:** Assemble the two pull-out storage drawers. It is recommended to install the drawer stops before fully building the frame if the instructions allow, as this can be difficult once the frame is complete. Insert the assembled drawers into their compartments under the bed.
- Secure Fence/Guardrails:** Attach the fence/guardrails to the perimeter of the bed.
- Final Tightening:** Once all components are in place, go back and securely tighten all screws and bolts. Do not overtighten to avoid damaging the wood.
