

NCVI 19/49min Washing Time

NCVI Baby Bottle Washer Sterilizer and Dryer

MODEL: 19/49MIN WASHING TIME

1. Product Overview

The NCVI Baby Bottle Washer Sterilizer and Dryer is a 4-in-1 appliance designed to automate the cleaning, sterilization, drying, and storage of baby feeding essentials. It features a spacious dual-layer design capable of accommodating up to 6 standard bottles, pump parts, pacifiers, and other accessories. This unit utilizes heated wash cycles and powerful spray jets for thorough cleaning, followed by hospital-grade steam sterilization and efficient drying with a medical-grade HEPA filter for extended sterile storage.

3. Getting Started (Setup)

1. **Placement:** Place the unit on a stable, flat countertop near a sink. Ensure adequate space for the drain hose.
2. **Connect Drain Hose:** Attach the drain hose to the outlet port at the rear of the machine. Secure the other end of the hose in your sink using the provided suction cups to ensure proper drainage.
3. **Fill Water Tank:** Open the water tank lid and fill the tank with 2.6 liters of distilled or purified water. Close the lid securely.
4. **Load Items:** Place bottles upside down on the designated pegs in the lower rack. Arrange pump parts, pacifiers, and smaller accessories in the upper basket. Ensure all items are positioned to allow water and steam to reach all surfaces.
5. **Add Detergent Tablet:** Place one detergent tablet into the designated compartment at the bottom of

the main washing chamber.

6. **Secure Lid:** Close the main transparent lid firmly until it clicks into place.
7. **Power On:** Plug the power cord into a North American 120V compatible outlet. Press the power button on the control panel to turn on the unit.

4. Operating Instructions

The NCVI bottle washer offers 7 customizable modes to suit various cleaning needs. The intuitive control panel allows for easy selection.

Why Wash 4 Bottles When You Can Wash 6?

Image: Control panel displaying Fast Wash (19 min, 131°F) and Strong Wash (49 min, 140°F) options.

Available Modes:

- **Sterilize Only:** Long press power button once. (10 min)
- **Dry Only:** Long press power button twice. (45 min)
- **Sterilize & Dry:** Long press power button three times. (45 min)
- **Wash Only (Fast Wash):** Press 'Wash Only' once. (19 min)
- **Wash Only (Strong Wash):** Press 'Wash Only' twice. (49 min)
- **Auto (Fast Wash + Sterilize + Dry):** Press 'Auto' once. (89 min)
- **Auto (Strong Wash + Sterilize + Dry):** Press 'Auto' twice. (119 min)

All Auto and Sterilize+Dry modes automatically transition to a 72-hour storage mode after completion,

maintaining a sterile environment.

Product Mode		 (29min Strong Wash)	 (49min Strong Wash)
Wash Only	Fast Wash+ Standby	19min	19min
	Strong Wash+ Standby	29min	49min
Auto	Fast Wash+ Sterilize+Dry	89min	89min
	Strong Wash+ Sterilize+Dry	99min	119min

Image: Quick Start Guide table detailing all available modes and their settings.

Cleaning Process Highlights:

- **Powerful Spray Jets:** The unit features 39 powerful spray jets (3 top swirling, 24 precision direct, 9 turbo swirling) for 360° deep cleaning.
- **Heated Wash Cycles:** Water is heated to 131-140°F (55-60°C) for effective cleaning.
- **Steam Sterilization:** Steam at 212°F (100°C) eliminates 99.99% of harmful germs and bacteria.
- **3D Airflow Drying:** Built-in dryer with 14-port 3D airflow ensures items are completely dry.

5. Care and Maintenance

Regular cleaning and maintenance ensure optimal performance and longevity of your NCVI bottle washer.

- **Disassembly:** The internal components, including the spray arm and bottle rack, can be easily disassembled for thorough cleaning. Refer to the user manual for detailed steps.
- **Inner Wipe Cleaning:** After each use, wipe down the interior of the washing chamber to remove any

residue.

- **Water Tank:** Periodically clean the water tank to prevent mineral buildup. Use a descaling solution if necessary.
- **HEPA Filter:** The medical-grade HEPA filter should be replaced every 6 months to maintain a sterile environment and prevent odors.

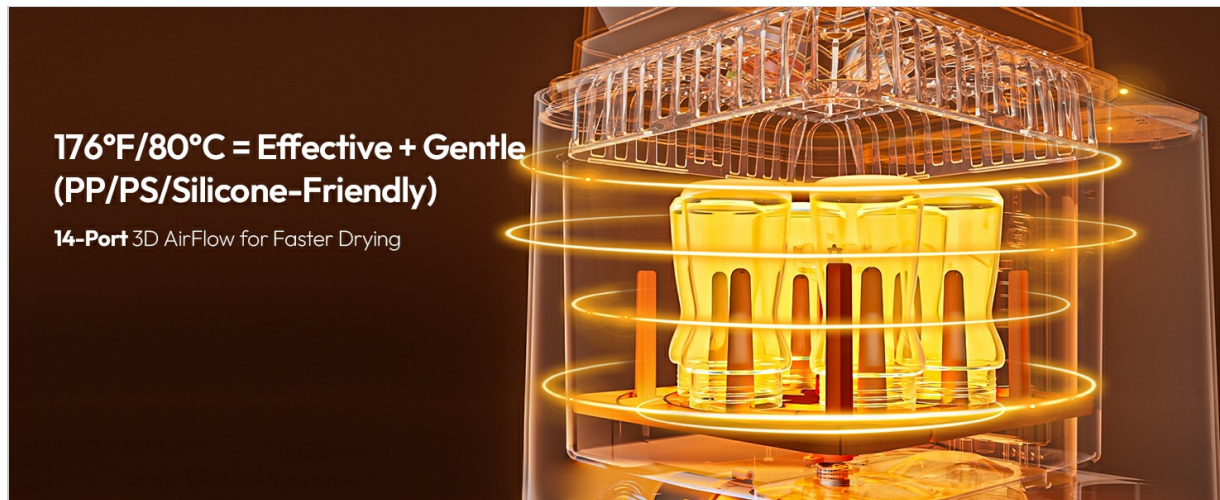

Image: The HEPA and Plasma filtration system, crucial for maintaining clean, odor-free air within the unit.

6. Troubleshooting

If you encounter any issues with your NCVI bottle washer, please refer to the following common troubleshooting tips:

- **Machine Not Starting:** Ensure the power cord is securely plugged in and the unit is powered on. Check if the lid is properly closed.
- **Poor Cleaning Results:** Verify that items are loaded correctly, not obstructing spray jets. Ensure a detergent tablet was used and the water tank is filled.
- **Water Residue After Drying:** Confirm that the drain hose is correctly positioned and not kinked. Ensure the selected drying cycle is appropriate for the load size.
- **Unusual Odors:** Clean the internal components and replace the HEPA filter if it's due for replacement.

For more detailed troubleshooting, please consult the full user manual.
