Gosasa 1533

Gosasa Men's Square Quartz Watch (Model 1533) - User Manual

Introduction

Welcome to the user manual for your Gosasa Men's Square Quartz Watch, Model 1533. This guide provides essential information on how to set up, operate, maintain, and troubleshoot your watch to ensure optimal performance and longevity. Please read this manual thoroughly before using your watch.

Product Overview

The Gosasa Men's Square Quartz Watch is designed for both business and casual wear, featuring a sleek square case, three-dimensional embossed markers, and luminous hands. It includes a clear day-date display and is powered by a reliable quartz movement for accurate timekeeping. The watch is available with either a silicone or stainless steel band and is rated 3ATM waterproof for daily use.

Setup and Initial Adjustment

Before wearing your watch, you may need to set the correct time and date.

Image: Close-up view of the watch face, showing the crown on the right side of the case, used for setting time and date.

Setting the Time

1. Pull the crown out to the **second click position** (farthest out).
2. Turn the crown clockwise or counter-clockwise to move the hands and set the desired time.
3. Once the time is set, push the crown back in to its normal position to start the watch.

Setting the Date

1. Pull the crown out to the **first click position** (halfway out).
2. Turn the crown clockwise or counter-clockwise to adjust the date. Avoid setting the date between 9 PM and 3 AM, as this can interfere with the automatic date change mechanism.
3. Once the date is set, push the crown back in to its normal position.

Operating the Watch

Wearing and Adjusting the Band

Ensure the watch band is comfortably fitted around your wrist. For silicone bands, adjust the buckle to the desired hole. For stainless steel bands, adjustments may require professional assistance to remove or add links.

Luminous Display

Your Gosasa watch features luminous hands and markers. These elements absorb light during the day and glow in low-light conditions, providing enhanced readability at night. The intensity and duration of the glow depend on the amount of light exposure.

Maintenance and Care

Cleaning Your Watch

To maintain your watch’s appearance, wipe it regularly with a soft, lint-free cloth to remove dirt and oils. This will prevent build-up that can damage the surface over time. Avoid using harsh chemicals or abrasive materials.

Water Resistance (3ATM)

Your Gosasa watch is rated 3ATM (30 meters) water resistant. This means it is suitable for daily use and can withstand splashes, rain, and handwashing. **It is NOT suitable for swimming, bathing, showering, diving, or any water sports.** Avoid pressing buttons or operating the crown when the watch is wet, as this can compromise the water seal.

Avoiding Chemicals

Keep your watch away from strong chemicals, perfumes, lotions, and cleaning agents. These can damage the materials, particularly silicone bands and the watch's finish.

Troubleshooting

If you encounter any issues with your watch, please refer to the table below for common problems and solutions.

Problem	Possible Cause	Solution
Watch is not running.	Battery depleted.	Replace the battery. This should be done by a qualified watch technician.
Time or Date is incorrect.	Needs adjustment.	Refer to the "Setting the Time" and "Setting the Date" sections in this manual.
Condensation inside the watch.	Exposure to extreme temperature changes or compromised water resistance.	Avoid extreme temperature changes. If condensation persists, contact customer support as the water resistance may be compromised.
Luminous feature not glowing.	Insufficient light exposure.	Expose the watch to bright light (natural or artificial) for a period to charge the luminous material.

Specifications

Brand	Gosasa
