7. Troubleshooting

If you encounter issues with your toaster oven, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Oven does not turn on.	Not plugged in; power outlet malfunction; timer not set.	Ensure the power cord is securely plugged into a working outlet. Turn the timer knob to the desired cooking time.
Food is not cooking evenly.	Incorrect rack position; food too close to heating elements; uneven food distribution.	Adjust rack position for optimal heat distribution. Ensure food is centered and not touching heating elements. Rotate food halfway through cooking if necessary.
Oven produces smoke during operation.	Food residue on heating elements or interior; initial burn-off.	For first use, this is normal. For subsequent uses, ensure the oven interior and accessories are clean. Unplug and allow to cool, then clean thoroughly.
Timer does not advance or bell does not sound.	Timer mechanism issue.	If the timer is not functioning, contact customer support.
