LIVLUX LIVLUX1266

LIVLUX 160x200 Storage Bed with Slatted Frame and Adjustable Headboard User Manual

Model: LIVLUX1266

INTRODUCTION

This manual provides detailed instructions for the assembly, operation, and maintenance of your LIVLUX 160x200 Storage Bed. Please read all instructions carefully before beginning assembly and retain this manual for future reference. The LIVLUX storage bed features a robust slatted frame, an upholstered headboard, integrated LED lighting, and four convenient storage drawers. It is designed for comfort and practicality in modern living spaces.

IMPORTANT SAFETY INFORMATION

- **Maximum Weight Capacity:** The bed is designed to support a maximum weight of 250 kg (550 lbs). Do not exceed this limit to ensure safety and product longevity.
- **Children:** This product is not suitable for children under 6 years of age without adult supervision.
- **Assembly:** Ensure all components are securely fastened before use. Periodically check and tighten all connections.
- **Placement:** Position the bed on a flat, stable surface.
- **Electrical Components:** For models with LED lighting, ensure proper connection to a power source. Do not expose electrical components to moisture.

PACKAGE CONTENTS

Your LIVLUX bed is delivered in two separate packages, which may arrive on different days. Please ensure you have received both packages before starting assembly.

Begin by assembling the main bed frame components. Connect the side rails to the headboard and footboard using the provided hardware. Ensure all bolts are tightened securely but do not overtighten until the frame is fully aligned.

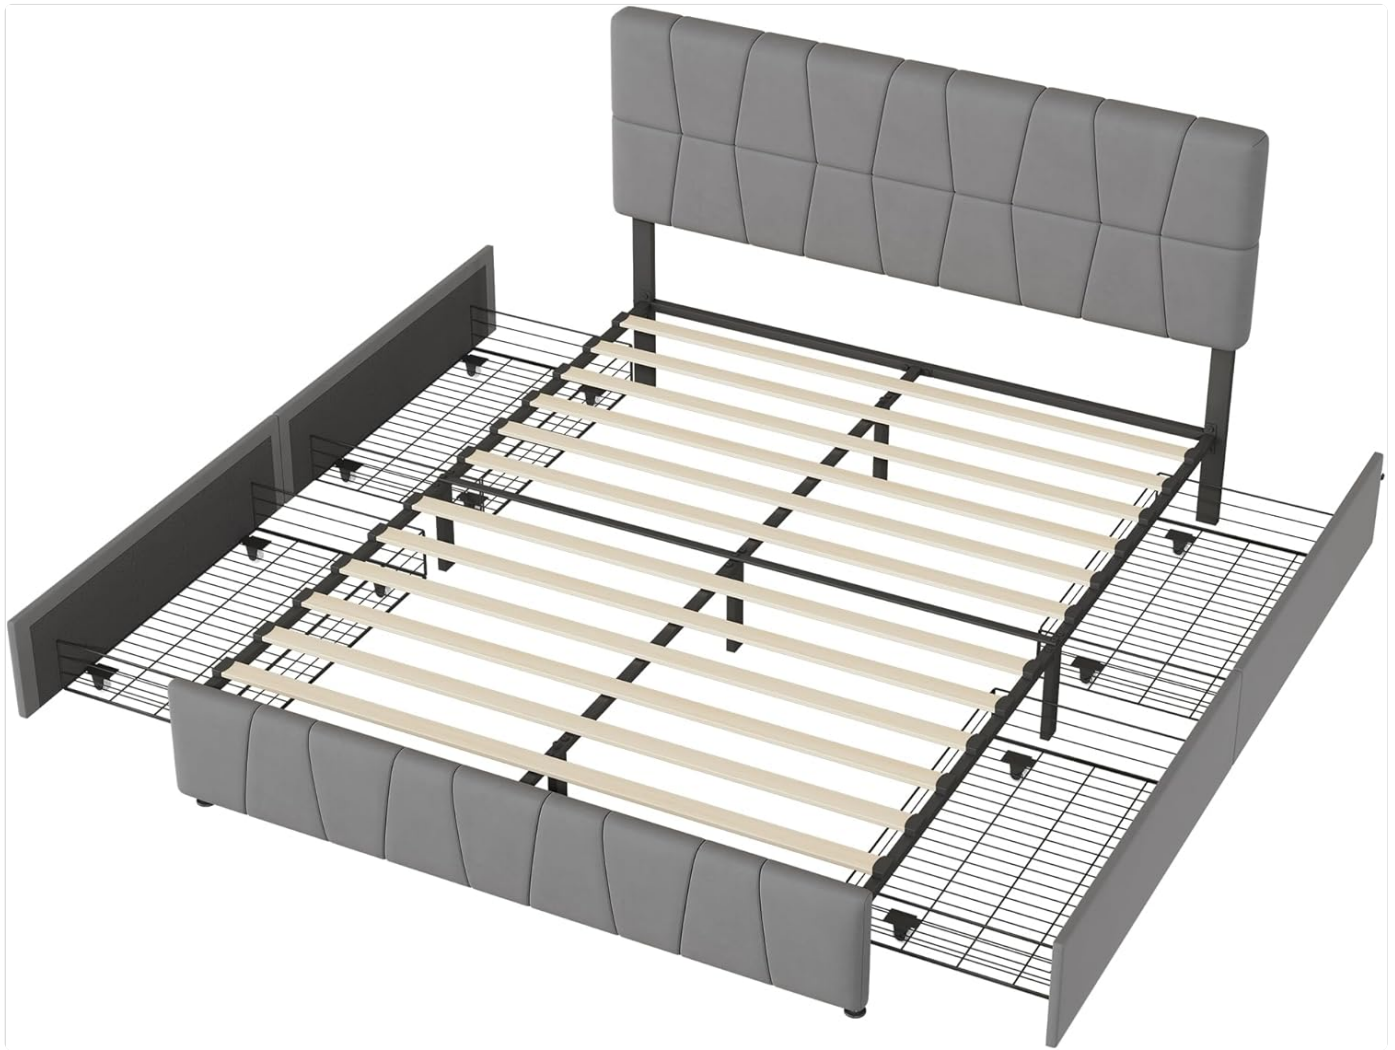

Figure 2: Exploded view of bed components for assembly reference.

3. Install the Slatted Base

Once the main frame is stable, install the slatted base. The robust slatted frame is designed to distribute weight evenly. Ensure each slat is properly seated and secured according to the assembly guide.

4. Assemble and Insert Storage Drawers

Assemble the four storage drawers. Each drawer is equipped with wheels for easy access. Once assembled, slide them into the designated spaces under the bed frame. The drawers are designed to fit on both sides of the bed.

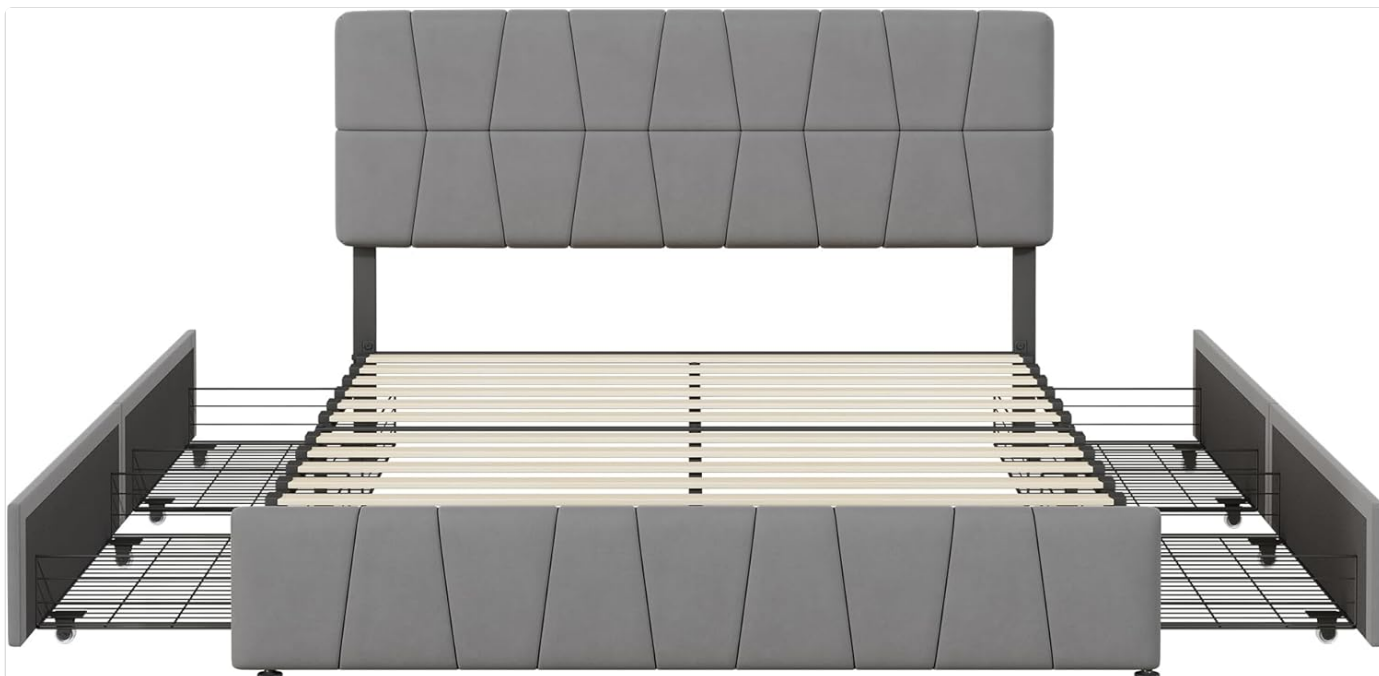

Figure 3: Bed frame with slatted base and storage drawers.

5. Connect LED Lighting (if applicable)

If your model includes LED lighting, follow the specific instructions for connecting the LED strip and power supply. Typically, the LED strip attaches to the headboard, and the power cable connects to a wall outlet.

6. Final Check

Before placing your mattress, perform a final check to ensure all connections are tight and the bed frame is stable. Test the functionality of the storage drawers.

OPERATING INSTRUCTIONS

Using the Storage Drawers

The LIVLUX bed is equipped with four storage drawers, two on each side. To access, simply pull the drawer outwards from under the bed. To close, push the drawer back until it is fully under the bed frame. The wheels ensure smooth operation.

Figure 4: Storage drawers in use, providing ample space for various items.

Adjusting the Headboard

The upholstered headboard is designed for comfort. While the product description mentions an "adjustable headboard," the images and specifications do not clearly indicate a mechanical adjustment mechanism. It typically refers to the comfortable, padded design. If your specific model includes a height adjustment feature, refer to the separate assembly guide for detailed instructions on how to adjust its height.

Controlling the LED Lighting

For models with integrated LED lighting, use the provided remote control to operate the lights. The remote allows you to:

- Turn the lights On/Off.
- Change the color of the LED lights.
- Adjust brightness levels.
- Select various lighting modes (e.g., static, fade, flash).

Ensure the LED power supply is connected to a functional power outlet for the lights to operate.

MAINTENANCE AND CARE

General Cleaning

Regularly dust the bed frame with a soft, dry cloth. For the upholstered parts (velvet/linen), use a soft brush or a vacuum cleaner with an upholstery attachment to remove dust and debris.

Figure 5: The bed's fabric is designed to be skin-friendly, soft, comfortable, and breathable, requiring gentle care.

Stain Removal

For spills on the upholstered fabric, blot immediately with a clean, dry cloth. For stubborn stains, use a mild fabric cleaner specifically designed for velvet or linen, testing on an inconspicuous area first. Avoid harsh chemicals or abrasive cleaners.

Frame Care

Periodically check all bolts and screws and tighten them if necessary to maintain the bed's stability and structural integrity. Avoid dragging the bed when moving it; lift it to prevent damage to the frame and floor.

LED Lighting Care

Ensure the LED strip and wiring are not pinched or damaged. If the LED lights malfunction, check the power connection and the remote control battery before contacting support.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Bed feels unstable or wobbly.	Loose connections or uneven floor.	Check and tighten all bolts and screws. Ensure the bed is on a level surface.
Storage drawers do not slide smoothly.	Obstruction, damaged wheels, or uneven assembly.	Check for objects blocking the drawers. Inspect wheels for damage. Re-check drawer assembly.
LED lights are not working.	Power supply issue, remote battery, or damaged wiring.	Ensure the power adapter is securely plugged into a working outlet. Replace remote control batteries. Check LED wiring for visible damage.
Squeaking noises from the bed.	Loose connections or friction between components.	Tighten all bolts. Apply a small amount of lubricant (e.g., silicone spray) to contact points if necessary, avoiding fabric.

PRODUCT SPECIFICATIONS

Feature	Detail
Brand	LIVLUX
Model Number	LIVLUX1266
Color	Grey
Overall Dimensions (L x W x H)	209 x 162.5 x 109 cm (82.3 x 64 x 42.9 inches)
