Model: WL000052TW4

Introduction

Thank you for choosing the Bellemave Twin Floor Bed Frame. This metal Montessori-style bed features a playful roof design and full-length guardrails, creating a safe and engaging sleep and play environment for children. Its low-profile design promotes independence, allowing children to easily get in and out of bed. This manual provides essential information for assembly, safe use, and maintenance of your new bed frame.

Safety Information

- Always exercise caution around the bed frame's edges, especially when children are present.
- Ensure all connections are securely tightened after assembly and periodically check for any loosening.
- The low-profile design is intended to minimize fall risk, but adult supervision is always recommended.
- Do not allow children to hang or climb on the roof structure or guardrails, as this may cause damage or injury.
- Use only a standard twin-size mattress that fits snugly within the frame to prevent gaps.

1. **Unpack and Identify:** Carefully unpack all components and lay them out. Refer to the parts list to ensure everything is present.
2. **Assemble the Base:** Begin by connecting the main bed frame sections to form the rectangular base. Secure with the provided hardware.
3. **Attach Guardrails:** Fasten the full-length guardrails to the sides of the bed base. Ensure they are firmly attached.
4. **Install Mattress Support:** Place the mattress support slats across the bed frame. These eliminate the need for a box spring.
5. **Construct the Roof:** Assemble the roof frame components and attach them to the top of the bed frame.
6. **Final Tightening:** Once all parts are in place, double-check and tighten all screws and bolts to ensure stability.

- **Avoid Overloading:** Do not exceed the recommended weight capacity for a twin bed.
