Maintenance and Care

- **Hardware:** Periodically check all bolts and screws to ensure they remain tight. Re-tighten if necessary to maintain stability and prevent squeaks.
- **Slats:** Ensure the wooden slats are properly seated and undamaged. Replace any broken or cracked slats immediately to maintain mattress support.

- **Avoid Excessive Moisture:** Protect the wood finish from prolonged exposure to moisture.

Troubleshooting

- **Squeaking Noises:** If the bed frame makes squeaking noises, check all bolts and screws and tighten them securely. Ensure the slats are properly seated and not rubbing against the frame.
- **Instability:** If the bed feels unstable, re-check all connections and ensure they are fully tightened. Verify that the bed is on a level surface.
- **Sliding Door Issues:** If the barn doors are difficult to slide, check the rails for any obstructions or debris. Clean the rails and ensure the rollers are moving freely.
