Setup

1. Connecting the Mouse

1. Locate an available USB port on your computer.
2. Plug the USB connector of the Redragon M730 mouse into the USB port.
3. The mouse is plug-and-play and should be automatically recognized by your operating system (Windows, macOS, etc.).

2. Software Installation (Optional for Advanced Features)

To unlock the full customization potential of your Redragon M730 mouse, including programmable buttons and advanced RGB settings, it is recommended to install the official Redragon software.

- Visit the official Redragon website.

- Navigate to the support or downloads section and locate the software for the M730 model.
- Download and run the installer, following the on-screen instructions.
- Once installed, launch the software to configure your mouse settings.

Operating Instructions

1. DPI Adjustment

The Redragon M730 features 5 redefinable DPI levels, allowing you to adjust cursor sensitivity on the fly. The default DPI settings are 800, 1200, 1600, 2400, and 10000.

- To cycle through the preset DPI levels, press the**DPI Adjust Button** located behind the scroll wheel.
- Each press will switch to the next DPI level, indicated by a change in the mouse's LED lighting (if configured).
- For custom DPI settings (from 100-10000 DPI) and to assign specific colors to each level, use the Redragon software.

Redragon M730 mouse in the foreground.

2. Programmable Buttons

The M730 mouse features 6 programmable buttons that can be customized for various functions, macros, or keybinds using the Redragon software.

- **Left Button:** Standard left click.
- **Right Button:** Standard right click.
- **Scroll Wheel:** Scroll up/down, and middle click.
- **DPI Adjust Button:** Cycles through DPI levels.
- **Forward Button:** Default for navigating forward in web browsers/folders.
- **Backward Button:** Default for navigating backward in web browsers/folders.

To reassign any of these buttons, open the Redragon software and follow the instructions for button customization.

3. RGB Backlighting

The M730 mouse features 8 dynamic RGB backlit modes to enhance your gaming setup.

- **Default Modes:** Colorful Streaming, Steady, Breathing, Colorful Tail, Neon, Wave, Reaction, LED OFF.
- To cycle through these modes, typically a combination of buttons (e.g., DPI button + a side button) or a dedicated button (if available) can be used. Refer to the software for specific controls if not immediately apparent.
- Advanced customization of colors, effects, and brightness is available through the Redragon software.

Maintenance

Cleaning Instructions

- Disconnect the mouse from your computer before cleaning.
- Use a soft, lint-free cloth slightly dampened with water or a mild cleaning solution to wipe the surface of the

mouse.

- Avoid using harsh chemicals, abrasive cleaners, or solvents, as these can damage the mouse's finish.
- For crevices and around buttons, use a cotton swab or compressed air to remove dust and debris.
- Ensure the mouse is completely dry before reconnecting it to your computer.

Storage

When not in use, store the mouse in a clean, dry environment away from direct sunlight and extreme temperatures. Avoid coiling the cable too tightly to prevent damage.

Troubleshooting

- **Mouse not responding:**
  - Ensure the USB cable is securely plugged into a working USB port.
  - Try plugging the mouse into a different USB port on your computer.
  - Restart your computer.
  - Check if the mouse works on another computer to rule out a system-specific issue.
- **DPI not changing:**
  - Ensure you are pressing the correct DPI Adjust Button.
  - If using custom settings, verify they are correctly configured in the Redragon software.
  - Reinstall the Redragon software if necessary.
- **RGB lighting not working or incorrect:**
  - Check the RGB settings within the Redragon software.
  - Ensure no conflicting software is running that might control RGB lighting.
  - Try cycling through the built-in lighting modes using the mouse buttons.
- **Buttons not programmable:**
  - Ensure the Redragon software is installed and running.
  - Verify that the button assignments are saved correctly within the software.
  - Update the mouse firmware if an update is available through the software.
- **Cursor movement is erratic or imprecise:**
  - Clean the optical sensor on the bottom of the mouse.
  - Use the mouse on a clean, uniform surface or a high-quality mouse pad.
  - Adjust the DPI settings to a suitable level.
