VATOS BB8803A

VATOS Infrared Laser Tag Guns with Vest Instruction Manual

Model: BB8803A

Introduction

The VATOS Infrared Laser Tag Guns with Vest set provides an interactive and engaging experience for multiple players. This manual outlines the steps for setup, operation, and maintenance to ensure optimal enjoyment and longevity of your product.

Safety Information

- This product uses infrared signals, which are safe for eyes. No actual lasers are emitted.
- Not suitable for children under 3 years due to small parts. Recommended for ages 6 and up.
- Do not aim at eyes or face.
- Use only specified batteries. Do not mix old and new batteries or different types of batteries.
- Adult supervision is recommended during play.

Package Contents

- 2 x Laser Tag Guns (Red and Blue)
- 2 x Vests (Red and Blue)
- 1 x Screwdriver
- 1 x Instruction Manual

Setup

Battery Installation

Each laser tag gun and vest requires 3 x 1.5V AA batteries (not included).

1. Use the provided screwdriver to open the battery compartment on the back of the vest and the bottom of the gun handle.

2. Insert 3 x 1.5V AA batteries into each device, ensuring correct polarity (+/-).
3. Securely close the battery compartments with the screwdriver.

This image illustrates the process of opening the battery compartments on both the laser tag vest and gun, and inserting batteries.

Wearing the Vest

Adjust the straps on the vest to ensure a snug and comfortable fit. The vest should be worn on the chest, with the sensor facing outwards.

A child demonstrates wearing the laser tag vest, showing how it should be positioned for optimal play.

Power On

Press the power button on both the gun and the vest to turn them on. They will automatically pair.

Your browser does not support the video tag.

This video from the seller demonstrates the battery installation process for the laser tag guns and vests.

Operating Instructions

Team Selection

The set supports multiplayer games with up to 4 teams. Each gun and vest can be assigned to a team color (Red, Green, White, Blue).

1. After powering on, press the "Team Select" button on the gun to cycle through team colors.
2. Ensure all players on the same team select the same color.

This diagram labels the components of the laser tag gun and illustrates the team selection process.

Gun Modes

The laser tag guns feature 4 unique firing modes: Pistol, Shotgun, Machine Gun, and Rocket. Each mode has different damage and reload characteristics.

1. Press the "Gun Mode" button on the side of the gun to switch between modes.
2. Listen for the audio prompt confirming the selected mode.

This image details the four available gun modes, showing the number of shots per reload and the life points lost per hit for each mode.

Gameplay

Aim your laser tag gun at an opponent's vest to score hits. The vest will vibrate and display remaining life points. When your life points reach zero, your vest will indicate "Game Over".

A player demonstrates aiming the laser tag gun during gameplay.

Reset and Revive

To reset your life points and re-enter the game after being eliminated, press the "Reset/Revive" button on your gun.

Your browser does not support the video tag.

This video from the seller illustrates the pairing process between the gun and vest, the shooting mechanism, and how to reset and revive during gameplay.

Mute Mode (Stealth Attack)

Activate mute mode for a stealthy approach. In this mode, sound effects are disabled, allowing for surprise attacks.

Your browser does not support the video tag.

This video from the seller shows the activation and effect of the mute mode, allowing for silent gameplay.

Maintenance

- Keep the devices clean by wiping them with a dry cloth. Do not use liquid cleaners.
- Remove batteries if the product will not be used for an extended period to prevent leakage.

- Store in a cool, dry place away from direct sunlight.

Troubleshooting

Device Not Powering On

- Check if batteries are inserted correctly with the right polarity.
- Replace with fresh batteries.

Devices Not Pairing

- Ensure both the gun and vest are powered on.
- Make sure they are within close proximity during initial pairing.
- Try turning both devices off and on again.

Inaccurate Hits

- Ensure the vest sensor is not obstructed.
- Verify that the shooting distance is within the recommended range (up to 100 feet / 30 meters).

Specifications
