Gizoon CC14-H

Gizoon 10x10 FT Outdoor Storage Shed Instruction Manual

Model: CC14-H | Brand: Gizoon

Introduction

Thank you for choosing the Gizoon 10x10 FT Outdoor Storage Shed. This manual provides essential information for the safe assembly, operation, and maintenance of your new storage shed. Please read all instructions carefully before beginning assembly and retain this manual for future reference.

This large utility metal tool shed is designed to provide ample storage space for your outdoor equipment, tools, and supplies, featuring lockable double doors and four air vents for optimal ventilation.

Safety Information

WARNING: Failure to follow these safety instructions may result in serious injury or property damage.

- **Level, Solid Ground is Mandatory:** NEVER install on soft, uneven, or sloping ground. This can cause the structure to twist, collapse, or doors to malfunction.
- **Check Local Codes:** It is the owner's responsibility to check with local municipal authorities regarding required permits, zoning laws, and wind/snow load regulations for auxiliary structures.
- **Avoid Overhead Hazards:** Install at a safe distance from power lines, tree limbs, or any other overhead obstructions.
- **Allow for Access & Ventilation:** Position the shed with enough clearance to fully open doors and allow for air circulation.
- **Personal Protective Equipment:** Always wear safety glasses, heavy-duty work gloves, and sturdy shoes during assembly.
- **Lifting Injury Prevention:** Most panels are large and awkward. Use a two-person team to lift and position parts. Lift with your legs, not your back.
- **Tool & Ladder Safety:** When using a power drill, follow all manufacturer safety instructions. Use a stable, properly rated ladder (not a chair or box) when installing the roof. Ensure the work area is clean and dry to prevent slips and falls.
- **Children & Pets:** Keep all children and pets away from the assembly area at all times. Small parts and sharp

metal edges pose choking and laceration hazards.

- **Weather Conditions:** DO NOT assemble during high winds, rain, lightning, or inclement weather. Wet conditions make metal slippery and increase risk.
- **Anchoring is Required in High-Wind Areas:** This is a lightweight metal structure. To prevent tipping or becoming airborne in storms, it MUST be securely anchored to a permanent concrete slab or approved ground anchors (sold separately) as per the manual. This is critical in regions prone to hurricanes, tornadoes, or strong gusts.
- **Roof Load Warning:** DO NOT climb on the roof. It is not designed to support human weight. Clear excessive snow accumulation promptly using a roof rake from ground level.

Package Contents

The Gizoon 10x10 FT Outdoor Storage Shed is shipped in three separate packages. These packages may arrive at different times. Please ensure all packages have arrived and all parts are accounted for according to the instruction manual before beginning assembly.

Note: Floor is NOT included with this product. For stability and moisture protection, installation on a flat, sturdy platform is required.

Setup Instructions

1. Site Preparation and Foundation

As noted in the safety information, a level and solid foundation is crucial for the stability and longevity of your shed. This product does not include flooring. Consider a concrete slab or a robust wooden platform as a base.

Ensure the chosen site allows for full door opening and adequate ventilation around the shed.

2. Assembly Tips

- It is recommended to install the shed on a windless day.
- Assembly typically requires 2-3 people and can be completed in 3-5 hours.
- An electric drill will be necessary for assembly.
- Carefully review the included instruction manual for detailed step-by-step assembly diagrams and instructions.
- Some parts may have protective film; remove this film during assembly.

3. Securing the Shed

After assembly, ensure the shed is securely anchored to its foundation to prevent movement, especially in high-wind conditions. Anchoring hardware is typically sold separately.

Product Features

- **Superior Durability & All-Weather Resistance:** Constructed from heavy-duty, fully galvanized steel, resistant to rust, corrosion, and fading.
- **Massive & Organized Storage Capacity:** 10x10 FT footprint (630 CU.FT storage capacity) with a high ceiling for maximum usable space.
- **Enhanced Security & Ventilation:** Features a robust lockable door (lock included) and four integrated ventilation flaps to prevent moisture buildup.
- **Spacious Double Doors:** Convenient double doors swing wide open for easy loading and unloading of bulky items.
- **Functional Design:** Angled roof design efficiently sheds rainwater, and reinforced corners provide extra durability.

Operation

The Gizoon storage shed is designed for straightforward operation. The double doors can be opened wide for easy access to stored items. The included lock provides security for your belongings.

- **Door Operation:** Keep door tracks clean and lubricated for smooth opening and closing. Never force a door that is misaligned; adjust hinges as needed.
- **Ventilation:** The four integrated vents ensure air circulation, helping to prevent moisture and odors inside the shed.

Maintenance

Regular maintenance will extend the life of your Gizoon storage shed.

- **Regular Inspections:** Periodically inspect all bolts and connectors for tightness, especially after extreme weather. Check the foundation for settling.
- **Corrosion & Damage:** Inspect for scratches or rust. Treat any bare metal with touch-up paint to prevent corrosion. Do not use a pressure washer on a high setting, as it may damage the protective coating.
- **Roof Care:** Clear excessive snow accumulation promptly using a roof rake from ground level. Do not climb on the roof.
- **Cleaning:** Clean the exterior with mild soap and water. Avoid abrasive cleaners or tools that could scratch the galvanized steel finish.

Troubleshooting

If you encounter issues with your shed, consider the following common solutions:

- **Doors Not Aligning:** Check the shed's foundation for levelness. Uneven ground can cause the frame to twist, affecting door alignment. Adjust the foundation or re-level the shed as necessary. Ensure all frame bolts are tightened evenly.
- **Leaks:** Verify that all panels are correctly overlapped and all screws are securely fastened. Apply a silicone sealant to any small gaps or seams if water ingress is observed. Ensure the roof panels are properly installed and sealed.
- **Missing Parts:** If any parts were missing upon delivery, contact customer service immediately for assistance.
- **Bent Panels:** Minor bends from transit may require careful straightening during assembly to ensure proper fit. If panels are severely damaged, contact customer service.

Specifications

Attribute	Detail
Brand	Gizoon
Model Number	CC14-H
Color	Grey
Material	Galvanized Steel
Product Dimensions (D x W x H)	119.7"D x 119.7"W x 75.9"H
Item Weight	209.4 Pounds
Door Width	44.5 Inches
Door Height	62.9 Inches
Water Resistance Level	Water Resistant
Assembly Required	Yes
