Bonseor B0BKT9NN3M

Bonseor Headlight Repair Polish User Manual

Model: B0BKT9NN3M (30 ML, 1 Piece)

1. PRODUCT OVERVIEW

The Bonseor Headlight Repair Polish is a specialized fluid designed to restore clarity and improve the appearance of automotive headlight lenses. It targets common issues such as yellowing, oxidation, and light surface scratches, enhancing light output and overall vehicle aesthetics.

BEFORE

AFTER

Image 1.1: Headlight clarity before and after using the repair polish.

This product is formulated to create a protective barrier that helps prevent future degradation from environmental factors like sunlight, acid rain, and pollution.

Has this ever happened to your headlights?

2. IMPORTANT SAFETY INFORMATION

- **Keep out of reach of children and pets.**
- Use in a well-ventilated area to avoid inhaling fumes.
- Avoid contact with skin and eyes. In case of contact, rinse immediately with plenty of water and seek medical advice if irritation persists.
- Wear appropriate personal protective equipment, such as gloves and eye protection, during application.
- Do not ingest. If swallowed, do not induce vomiting. Seek immediate medical attention.
- Store in a cool, dry place away from direct sunlight and heat sources.
- Dispose of product and packaging according to local regulations.

3. PACKAGE CONTENTS

Your package contains:

- 1 x Bonseor Headlight Repair Polish (30 ML bottle)

4. BEFORE YOU BEGIN

1. **Clean the Headlight Surface:** Thoroughly wash the headlight lens with soap and water to remove any dirt, dust, or debris. Rinse completely and dry with a clean microfiber cloth.
2. **Inspect the Headlight:** Assess the condition of the headlight. This polish is most effective on yellowing, oxidation, and light scratches. For deep cracks or severe damage, professional repair may be required.
3. **Protect Surrounding Areas:** Mask off the painted areas around the headlight with automotive masking tape to prevent accidental contact with the polish.
4. **Ensure Proper Ventilation:** Work in a well-ventilated area, preferably outdoors or in an open garage.

5. APPLICATION INSTRUCTIONS

Follow these steps carefully for optimal results:

HOW TO USE

1

1. Wipe the lamp surface first.

2

2. Then take an appropriate amount of liquid and pour it on the surface of the headlight.

3

3. Finally sponge away the foam.

Image 5.1: Step-by-step application process for the headlight repair polish.

1. **Step 1: Wipe the Lamp Surface First.** Using a clean, dry microfiber cloth, give the headlight surface a final wipe to ensure it is completely free of dust and moisture.
2. **Step 2: Apply the Liquid.** Take an appropriate amount of the Bonseor Headlight Repair Polish and pour it directly onto the headlight surface. Ensure even coverage.
3. **Step 3: Sponge Away the Foam.** Immediately after applying, use a clean sponge or microfiber cloth to gently and evenly spread the polish across the entire headlight surface. Work in small sections if necessary. Continue wiping until the headlight appears clear and any foam or residue is removed.
4. **Allow to Cure:** After application, allow the treated headlight to dry completely. Avoid exposing it to moisture or direct sunlight for at least 24 hours to allow the protective layer to cure.

Note: This product is not recommended for use with car refurbishment sets or atomizer cleaners.

6. POST-APPLICATION CARE

To maintain the clarity and protective benefits of the headlight polish:

- Regularly clean your headlights with mild car wash soap and water.
- Avoid using abrasive cleaners or harsh chemicals on the treated surface.
- Reapply the polish as needed, typically every few months, depending on environmental exposure and headlight condition.

7. COMMON ISSUES AND SOLUTIONS

Issue	Possible Cause	Solution
Headlight remains cloudy or yellow after application.	Insufficient cleaning prior to application; severe oxidation requiring more aggressive treatment; improper application technique.	Ensure the headlight is thoroughly cleaned and dry. Reapply the polish, ensuring even coverage and sufficient wiping. For very severe cases, multiple applications or a more abrasive pre-treatment might be necessary (though not recommended with this product).
Results are temporary or fade quickly.	Incomplete curing of the protective layer; exposure to harsh elements too soon; underlying headlight damage.	Ensure the product cures fully for at least 24 hours without exposure to moisture. Reapply as part of regular maintenance.
Streaks or residue visible.	Excess product applied; not wiped thoroughly enough.	Use a clean, dry microfiber cloth to gently buff away any remaining streaks or residue. Apply a moderate amount of polish, not excessive.

8. PRODUCT SPECIFICATIONS

- **Brand:** Bonseor
- **Model:** B0BKT9NN3M
- **Capacity:** 30 ML
- **Material:** Aluminum Oxide, Zirconia Alumina (Liquid Abrasive)
- **Grit Type:** Fine
- **Compatible Material:** Plastic (Headlight Lenses)
- **Item Dimensions (L x W x H):** Approximately 1.57 x 1.18 x 3.34 inches (for 30 ML bottle)
