SETUP AND FIRST USE

Before using your new kitchen utensil set for the first time, follow these steps:

1. **Unpack:** Carefully remove all utensils from their packaging.
2. **Inspect:** Check each utensil for any signs of damage or manufacturing defects. If any issues are found, contact customer support.
3. **Clean:** Wash all utensils thoroughly with warm soapy water and a soft sponge. Rinse completely and dry immediately with a soft cloth to prevent water spots.

OPERATING INSTRUCTIONS

This 5-piece set is designed for various cooking tasks. Each utensil serves a specific purpose:

Image: Detailed view of each utensil in the set, identifying the Ladle, Basting Spoon, Skimmer, Slotted Turner, and Turner.

- **Ladle:** Ideal for serving soups, stews, sauces, and gravies. Its deep bowl allows for generous portions and easy transfer of liquids.
- **Skimmer:** Used to remove foam, fat, or food particles from liquids, such as broths, soups, or when deep-frying. The perforated design allows liquid to drain away.
- **Turner (Solid Spatula):** Perfect for flipping pancakes, eggs, burgers, or sautéing vegetables. Its wide, flat surface provides good support for delicate foods.
- **Spatula (Basting Spoon):** A versatile tool for stirring, mixing, scraping bowls, or basting meats with juices.
- **Slotted Turner:** Similar to the solid turner but with slots, making it excellent for lifting and draining foods from hot oil or liquids, such as fried fish or vegetables.

VERSATILE USES FOR YOUR KITCHEN

MAINTENANCE AND CARE

Proper care will extend the life and maintain the appearance of your stainless steel utensils.

- **Cleaning:** These utensils are dishwasher safe. For best results and to prevent water spots, hand wash with warm soapy water and dry immediately with a soft cloth. Avoid abrasive cleaners or scouring pads that can scratch the surface.
- **Storage:** Store utensils in a dry place. The pipe handles feature a hanging loop for convenient storage on a utensil rack.
- **Stain Removal:** For stubborn food stains, a paste of baking soda and water can be gently applied and then rinsed thoroughly.

TROUBLESHOOTING

- **Water Spots:** Stainless steel can develop water spots if left to air dry. To prevent this, always dry the utensils immediately after washing.

- **Discoloration:** High heat or certain foods can sometimes cause temporary discoloration. This is usually harmless and can often be removed with a stainless steel cleaner or a mixture of vinegar and water.
- **Rust:** While stainless steel is highly resistant to rust, prolonged exposure to harsh chemicals or moisture, especially in contact with other metals, can cause surface rust. If rust appears, it can often be removed with a non-abrasive stainless steel cleaner. Ensure utensils are completely dry before storage.
